

Mayorov Boris Ivanovich

Automation control and information-analytical work takes more than 30 years.

I propose, with the possible updating of the Constitution, the term "Authority" shall be replaced by the term "control" "Social management", and the media did not eat at all today: sure that the clarity of words and deeds of modern transparent social management according to the law, which he dreamed and Mikhail Speransky, and its modern, dynamic scientific up accelerate Russia's transition to an innovative economy of the globalized world. In this case, lead, renovated state apparatus new expert-political associations and other community until the family can and will be based on human dignity in accord: with the principles of an open, dynamic, distributed, and the universality of the historical validity of the social hierarchy. Russian population interpret the results of the twentieth century, the role of personality in history, its dignity, rights, freedoms and legitimate interests, the fact strength, money and knowledge in social management. And if force is used more frequently, the development of financial institutions and knowledge is yet to come. To be every person and country to determine its human and social capital for social arrangement and careful modernization (renovation) to live in the era of postmodernism.

The population of Russia, as well as other countries of the East, has retained archaic attitude to social management on the basis of strength and ref in their basic laws and traditions. For example, journalists are called - the fourth power of pop - stars - fifth, spies - 2nd ... aces from crime - 11th po The masses in the present "system of power" Russia as before and even more so in ancient times assigned (in theory) the role of a source of power (power). People are still destined to feed, drink, choose and endure at present passivity and low level of social development, and 3, and 5, and 10 law enforcement agencies (the authorities) have not yet ripe in the minds of the elite and the middle class modern national consciousness based on the th of social control and transform the way [Russia](#) into the global system of nation integrated into the world economy, where the current rational vertical management will be reinforced with horizontal bundles of civil society and their new traditional structures. The best is to minimize the power (coerc and maximization of concerted actions of citizens and organizations. In the meantime, after the collapse of the supreme power Emperor Nicholas II (population goes one incomprehensible power over the other, and it itself swears in families, in doorways, on the garden plots, pushed and skirmish o roads in anticipation of whether democracy, whether post democracy, or awaiting the birth of the people, or the nation, or representatives of the peop participation in the government, whether the distributed power of the people. Many expectations.

By the way, the Communist Party was the only force in the control system, which was preparing solutions, attracts thousands of people for numbe unanimous design of specific plans and monitor their implementation in the field of the same nomenclature ... and present-day practice, as it were, w the balance of political forces, without civil society with the division of the ruling power (power ...) "by the numbers" created a sense divided into L and JSC State for the spontaneous integration with the West, not all, but only able to objects and subjects. **In Russia not created adequate social cc for the current transitional period for the purpose of civilized self-entry of the Russian population in the community of developed countries. Institute of Economics for understanding the transition period created enough as long as the population does not interest anyone.**

My history

I appeared in Meshchera ([the area between the Klyazma and Oka](#)), in the Vladimir region, in a small Russian town [Kurlovo](#) December 17, 1950, which the villages and villages: Ulyahino, Parahina, Okatova, Aksenov ... [North-Eastern Russia](#), my ancestors, peasants and soldiers: Rusakova, Mayorov, Morozov, Sokolova, Volodya, Gorins ... My great-grandfather on the father - Hilarion, served before the revolution of 1917. forester, lived ripe old age and died of starvation in the 30s; on the mother's side - Jacob, Michael and his wife Natalia a peasant, both my grandfather [Teoctist Petr Rusakov](#) and Potr Mihaylovich Sokolov young for various reasons, are gone along with grandfathers in the revolutionary years before I was born.

My b olee distant ancestors probably came to the woods Meshchora from south Asia, or these people were the second wave of the spread of the hu through Western Europe from the shroud and [forests of Africa](#) ... I certainly pleasant and new theory, which argues that the civilization of Western E began from my ancestors. I hope that the scientific history of the peoples of the settlement will be available soon.

No doubt the man is part of the geographical environment and depends on it. On [mentality](#) (from the Latin mentalis - Mental.) - mind; attitude, character, worldview; a set of mental and sensory skills and value systems inherent to my countrymen significantly affected and westerly winds that every ten years intensified to hurricane.

Information on the nature of the environment serfs tried to reflect with exceptional clarity and detail, especially in terms of the influence of the kin master, and the natural conditions of life and health, the welfare of households, the situation of its economy. Westerly winds signaled the coming cha and especially of impending or possible danger.

Diversity and reality of this influence will inevitably lead to the images and generalizations ("Fire - king water - the queen of the earth - mother, tl sky - the father, the wind - Sir, rain - the breadwinner, the sun - prince moon - princess").

According to the stories of my mother, [she and her friends loved the Trinity](#) - old holy day and very upset when a holiday spoiled cold north-weste winds. And in memory of the adult population were kept raiding foreign masters or Western enemies. On these terms, the national character, the dan of the West and speculating irresponsibly modern orators, politicians, and various members of different alliances with academic degrees, which in re years there have been many.

My [father](#) retired from the Army in 1948. after [10 years of service](#) and [the war](#) in the North and Baltic seas, returned to their homes, [got married](#) ai found a permanent job in the town of [Gus-Crystal](#), where he settled in 1951. our [family](#). I was taken to a kindergarten and a raised garden: sledges, and slide in the winter, [in the summer](#) - the river, [collecting labels from the matches](#) and playing beer lids, analogue of coins, who played the older children. With five to 10 years, I have been inseparable with the girl from our yard, Tanya Rastorgueva. The boys of our yard seemed to me any mor stupid or more, or more and more stupid than me, which played a positive role and the girls in the following years I was always interesting.

In 1957. to the delight of the boys were released festival match with a particularly colorful labels. We were in the family and [the modern means of information](#), but most of all I liked the radio - this preference remains to this day.

In the summer, as it was made one change I was sent to summer camp "from the factory" and other enterprises of the city. Most vividly, I rememb when the movie ["The sailor with the" Comet "1958](#). Black Sea, lyrics, Moscow ... night in a forest glade shocked me.

At 9 years old ([in 1959. In that year, the Strategic Missile Forces](#)) I ran to the water its first rocket from a paper reel out of the factory thread, wh fuel was celluloid. The missile accidentally hit the stands in the road near the pole - I'm very happy, but to repeat the experiment failed. Once in the New Year's Eve 1961, while walking near the school, close to where we lived, I saw bright lights burning auditorium on the third floor, I went to school and his clothes in the 3rd floor. There ended the New Year concert of senior and announced last number. It was a song from the Old r released in 1961. Girls movie. Music, the kind of girl and boy singing together and the words ["... what are you going down the alley!"](#) It opened for new light in my world. In 12 years, I have somehow become especially popular with the girls in our class: Galina Kotova, Natasha Bykov, Valya Tu ... but especially Marina Zavalo, often acting on stage with his accordion, and, of course, I was sometimes light, although I was not the accordion. Tl the time of occurrence of the first love, one of the most important and memorable events in my life. Feelings associated with the first love of bright a

dramatic kept me in bright images [classmates](#) to the present day. Fundamentals of sex education already needed in 7-8 classes. Probably would understand why the girls mostly looked toward high school students and it would not hurt for your talents, you do not notice peers.

When our 7A entered into the Young Communist League, could not explain the Commission and answer questions a girl a year older than the prin of democratic centralism, which frankly [did not understand](#) though was a good student and has seriously understood and was fond of chess. Compan indiscriminate admission to the Young Communist League has ended, the parents did not notice this mishap and I remained outside the union: Many Komsomol less studied, and their meetings were boring. In the middle of the 7th grade, determined no longer to join the Komsomol, I sat in the back and stopped to awe relate to learning. In the back row I met with a class of 40 children closer: there were and repeaters, and just beyond the normal children. It was the first social learning in my life and my years of personal freedom, mushroom hikes in the forest in summer hockey fights on maki sites in winter, broken nose from a blow with a club, admiration [namesakes](#) brothers [Mayorov](#), genuine enjoyment of life and constant prayer for me sincere believer grandmother [Matrona](#).

In the 8th grade my mom who had offered to send me to pay preparatory courses at the local college. Perhaps the chief mechanic with armor from conscription to the army in its military youth weavers on fiberglass factory played a role. In the first years of study, I liked this idea and I will gladly the class and school, where I was not accepted into the Komsomol. Passed the exams in college is easy and almost better than anyone else in the gro immediately appointed a stipend of 20 rubles, but after a while I have lost interest in studies at the college program. More knowledge I acquired independently and concentrated on only one learning material when it was necessary. Sometimes I listened with half an ear, and I sit uninteresting to In my opinion it should not give children everything and require excellent marks in all subjects - people are different, and in the near future reform c education and reporting on it must undergo some changes, extending to children and young people all the values during training. For example, the fr choice of the value of the subject matter and level of development should be to learn and for our education system.

Prior to his studies in the first year we were sent to the village to the farm Bolshevik Sulovo help local Communists in potato harvesting. On subsequent courses already traveled to other local farms. Today, however, these collective farms were only dying village and a monument to the cha of the collective farm Bolshevik [Mayor Gorshkov](#).

In 17 years (summer 1968) earned the first money by working [as a loader at the factory](#) during [vacations in college](#), constantly went to dances, ad and girls are reluctant to include in their first love affairs, probably because of poor sex education in those years.

In [1970](#) he graduated from the Gusev Glass [College](#), where in addition to the free study without doing a lot of homework, which became my habi the last batch of 7-8 class, interested in literature: Pushkin, Dumas, Balzac, Zola, Dickens, Lermontov, Chekhov, Tolstoy, Turgenev, Leskov Gorky, Rousseau, Walter Mann, Antoine de Saint-Ekzyupepi always lying on my desk, constantly read the magazine "youth Technology", play chess tournaments and correspondence issued by a chess magazine 64, Chigorin, Alekhine and Karpov were my idols; fond of [music](#), [photos](#), but he was Komsomol member, and was not solemnly baptized in the Orthodox faith. Around me since childhood many women, as a rule, in the Orthodox faith found peace of mind.

The Party and the Government, and after the war, to keep the population under stress, tore the resources needed to restore the people's living stand increased its missile and nuclear forces - parents remain vigilant dedication to build communism, in which I had to live, and my education is not div - all natural and moral forces were exhausted. In my opinion, it was almost zero efficiency for the social development of the population. The post-wa Soviet period, in my opinion dobilo Russian people, depriving it of its universal values and sense of victory over fascism, depriving him of all the foundations of democracy - the leaders and after the Second World War have kept the population of the Soviet human freedom, according to Lenin, 1 meaning of which disappeared over the horizon. So naturally I grew up in individualism and rejection of the majority, and then matured and disgust Bolshevism, to justify their crimes voluntarily-forced complicity of the population.

In July, 1970. after preparatory courses at the institute and the protection of the degree project in its "invention", since neither noncommittal meeti with the girls, I was ready for college, but has not defined what and therefore, putting his tape library Vysotsky and [Beatles](#), [I went into the Army](#), e heroes of Russian literature XIX century left the Caucasus: continuous learning tired and I'm ready for new sensations. Especially because the yard c two-story hruschoby back in 1969. comrades from the army in the new uniforms, and even from most of Prague and mysteriously silent.

Pending Agenda recruiting office went to work at the factory in [the village of Pervomaisky](#), Selivanovsky district, Vladimir region, where I was appointed foreman and acting chief engineer of the plant. During the first month was able to express themselves and the chief mechanic, having gon vacation for 2 months, I left for themselves. During the first 100 days of independent living, I stoned glass melting furnace, aluminum sheets, persor repaired the milling machine, was shocked by the bare feet, which took place along the path past the factory gates girls and not having to kiss enoug said goodbye to his girl friend, and signed for the agenda, I waited for the Army and I was taken ...

[November 3, 1970](#) I was invited to the draft board and placed in the stench of a small room on the bench, and then sent under escort (nightmare ev appeal and stage then many more times will dream and I still could not anyone explain what has already served a fixed period) in the NCO school by "some" reason transferred to the part where after the course [of a young soldier](#) assigned mechanic - conductor special wagon for nuclear components to my regret our team were given old style uniform - around were forests and apparently the new uniforms for the rest of the army lacked. I ended m provincial youth and only the imperfection of his family and even more miserable life of my surroundings then took me to the active solutions to the social problems of our population. The entire flow of the revolutionary-patriotic education of those years called into action for very little money wit threat of up to 5 years in prison and confiscation of property for parasitism. Later, in the years of perestroika, I learned the real Russia's recent histor what meager positive, and sometimes more negative brought cartoons from my childhood about the Russian tsars, who painted a bad Ivan the Fool, pioneers, heroes, Gadfly, Pavel Korchagin, Komsomol Donbas ... - [Marchenko](#), [Bukovsky](#), [Novodvorskaja](#) and dozens of other romantics, the best of the country severely punish the party-state machine, the administration of the country for independent steps in the struggle for a better future, for comfortable about exist with a wide range of contemporary social relations. Thus awakened their struggle population for centuries accustomed to the administrative authority, it was at the polls in the KGB requests about the use of the death penalty, as it was with a student Novodvorskaia that at the beginning of his "revolutionary" activity threw his handwritten leaflets in the Kremlin Palace of Congresses Hall December 5, 1969. "October" befo beginning of the opera.

[Military power is](#) shocked and in August 1971. I [passed the exams](#) at the Military Engineering Academy, which is now named after Petra Velikogo the political officer of the selection committee suddenly announced to me that I did not pass the competition and offered to return to the part, enter tl Komsomol, to confirm the title of standouts in combat and political training and re-enter the Academy. It was another shock. Head of the commis tl promised to be enrolled in the Academy all passed the exams, and I was almost expelled in one piece for further service. Probably exchange officer, the applicants from the army, gaining himself obedient sergeants reported to everything about each other, at the end of the exams written to me in the selection committee a negative response and I do not fit into the hierarchy already during the first admission to the Academy. But then, for me, this f was not obvious, and exchange officers - educators were then and still are today far from the desired level. But it's not their fault. Officers usually becomes wiser after the resignation, and a series of changes in Russia are not conducive to the wealth of tradition in the formation of the officers - ai defenders of the fatherland and the dignity of every person's rights and freedoms.

At the end of compulsory military service under the command of a decent officer - Major Tarabanchuka, in the hot summer of 1972, [becoming a sergeant](#), standouts in combat and political training, member of the Komsomol, the winner of Mathematical Olympiad among students of the Army, was again handed over entrance examinations and I lost to the enthusiasm of the time We took. Accepted, despite or oversights my fighting paper in Lenin's room, which I was asked to write for the students before the final exam. And there for the courage, I wrote that we, applicants from the troop entered the Academy. because only he is worthy of life and libertv. who every dav comes for them to fight and referred to Goethe. who expressed hi:

Following the order of admission to the academy in early August 1972. I was given a 10 day vacation and I could see his hometown in the smoke burned peat Shatura, forests around the city buried soldiers and officers, not schadivshih his stomach. This nightmare struck me as the forerunner of nuclear war and I was in the Army.

Scientific-Technical School [Military Academy](#) was one of the best in the country and could be much higher. [Cadets live against the Kremlin](#), lect on natural sciences read generals; Professor of Mathematics, and World War II veteran, dashing he served in the Navy, Emma Shuvalov away my ca scientist or commander, when I recommended in ballistics group as a squad leader. It was pretty to me, perhaps because that belonged to the heroic generation of soldiers, what was my father. But ensigns taschivshie from the common pot, its methods taught me to be respected and their personas, to the vertical as a whole, up to the early orders to the kitchen. Their recommendation for a course officer - Ivan Belyaev was more authoritative than claims against them. Oh, in general, a good officer yards of Soviet and also according to the certifications of the Soviet period, he, like everyone else very probably, it was noted that he had betrayed the cause of the party. I wrote a statement of the nomination to the post of the Majorcan. I was surpr but the chief said that he made this conclusion on an existing template, and I'd better not mind even though I as a member of the CPSU have not heard anything about a particular case the party, which is supposed to be a devotee.

Relations with the course vertical I have not evolved. Educational process formally went under the supervision of the political departments of dub: theory of scientific communism. It turned out that the students were preparing for the final battle of the Cold War imperialism.

Future fraternity officer, horizontal relationships cadets and semantic field around did not develop. Chances are technically ready to fight for the cause of Lenin, all joined to selfish interests, for a place in the verticals, and that was decisive in relations between classmates then - after the release of the meetings were heard only stories of career success or failure. Such officers could serve any political or political regime of personal power or any person who turned in the highest positions. Progressiveness, reliability and validity of the political system determines the quality of the officer corps.

A year later, a study I was bored to participate in the socialist competition on the occasion of the birthday of [Leonid Brezhnev](#), nasty-depend on the warrant educators and homeless and exchange officers from his wretched life to learn from the excellent lectures from the scientific point of view, "at the center of world imperialism". [Revolutionary socialism](#) rooted in the past, the construction of communism comes to a standstill, and I could not find the meaning of any one nor the other, and even more in the third. Social issues being overshadowed by my scientific and technical interests. He became interested in psychology and sociology, became acquainted with the ideas of Freud and Jung, to search for the origins of the confrontation with the Soviet Union and Western countries did not find.

In his second year in 1974. I refused to participate in "educational" process of students and attending lectures on the international situation, instead the planned drill openly talked with foreign exchange officer. He recommended me demoted to the ranks and introduced within [5 days](#) from the bundle the Moscow garrison guardhouse. There currently stretched tendons on the hard work, which is performed under the supervision of an officer shout and with a red cap and other accessories (there was an aversion to combined arms officers, although they seem to look at me like I was an idiot of Engineering Academy). There, for the first time keenly felt like a hostage rigid subjective relations in the Army and cheap ["tool" command-administrative system of the state](#), which can be struck with his boot, throw on the bench, on the bunker, on a raising of virgin land or the construction BAM, the destruction of the president "friendly country", on the world revolution, discrimination or elimination of certain peoples or citizens of their country, etc. etc. The tool must obey the owner, the higher the vertical in the administration and in this thought and is the honor of an officer, a soldier tools country ... The Russian people do not create for themselves the state, and the state is determined by the population size for their needs. And as a cousin from the village - in the days of collective farms people were once again confused, mixed, confused ... In these years, our village is supplied not only cheap Colonels for the Army, but teachers, doctors. However, the range has been stagnation and ["treason"](#) - tools lost fear and needed a new ethic and salary, the country of the Soviets lose their effectiveness built on fear and enthusiasm of the people's intelligentsia. If the political system is outdated does not understand and does not feel the global trends, then the toolbox - the officers of leading countries have to not serve, and buck. What exacerbates the collapse of the country.

I had to edit his own outlook on the books of academic libraries in addition to the program of Marxist philosophy, political economy and scientific communism.

My absence from the occupation and the severe punishment of a soldier helped only the foreign exchange officer to get an apartment and a better position for persistence in the education of subordinates, and later, and look after the staff at the Deputy Kokoshin.

[It was the fourth year of compulsory military service ...](#), instead of 2 years, according to the law, I had to serve - 7 years, although after 3 November 1972, as a freshman academy, could be considered for the rank of ensign, as I have already served two years military service, he was an excellent military and political training, a sergeant, was a civil secondary special education ...

Rank honors and Komsomolets, for which I was sent to the troops a year earlier, it was only necessary political officer to cover their asses and send unconstructive hatred of the bourgeoisie. Statements of your old military service person of their legal interest caused only repression. However, a few years later, I began to assess the repressive regime to the entire population, and life itself is not free of internal areas. In fact, the Politburo as a reward obedience to allow workers to live and realize their plans in a large area within the borders of the USSR. Self-organization of the population excluded from the internal policy of the country.

Without becoming a warrant officer was demoted from sergeant to private (like the newly drafted), clamped in a vise of time, I did not drop out, but in addition to formal training continued the self-education in libraries and reading rooms in their plan. With interest I became acquainted with the concept [reverence for life and the refusal of the authorities A.Shveytsera](#) (later, after 1991. I reconsidered this position A.Shveytsera and now believe that it is necessary to restrict the natural role of the leader can not refuse, but also the desire for leadership of gray figures, giving [to Caesar what is Caesar's, unto God](#), maintaining a steady state of his own life). After the conversion [A.Solzhenitsina](#) to Patriarch Pimen returned to [the history of Russia and church](#). Of great interest is the peace initiatives of the legendary Academician [Andrei Sakharov](#), the concept of limits to growth, the protection of the environment of mankind and other local and global social issues that are relevant today.

At the undergraduate [married](#) and after a personal and brutal ultimatum zampolit Academy of General Orlov that the Academy does not teach for: "Free cheese is only in a mousetrap, and then only for a second mouse"), and is preparing a communist officers voluntarily-forcibly entered the Communist Party.

Party ticket was the addition of the chase an officer of the Armed Forces of the USSR, and I did not resist, and the reasons for this, I at that time did not work out completely. Perhaps in those days were written denunciations me with my remarks with doubts in the triumph of the ideas of Marxism-Leninism, and he naturally decided to test me personally. If I am convinced said that the Communists not to my way, then I would be expelled from academy and he would probably put in a separate paragraph in the report at the top of the results of its work to the Party and political work in the academy in a different wording. Today it is difficult to say who was General Orlov, and he saved me, or vice versa set up on me, I do not know. Later realized that the party-political [Eagles](#) inspired the Soviet people and economists, and lawyers, and physicists and chemists, and foremen workshops fields, that they are the builders of communism, first of all, and then specialists and scientific communism is the true doctrine. Career allowed to do within the framework of the party line, or in the interest of the party, but sharashkas forward or figuratively.

During practice at the cosmodrome "Baikonur" launch pad [Gagarin](#), which was held after the holidays in the poor areas of the Vladimir area, I was shocked by the immensity of the cost of these "objects of national pride." Surviving and correctly interpret it hard: life miserable country, and the means of the people and resources of the country went to the realization of communist ideas and [future apples on Mars](#), on a fierce propaganda triumph of doctrine [of Marx, Engels and Lenin](#). Since then, I do not like propaganda, advertising ... school teachers taught me without further dialogues on development above and artists serving someone's will (in the years of my youth they were fighters of the CPSU. as well as officers). Apparently. for

flight in the so-called "space" and travel around the world for his psyche could not pass without leaving a trace. For the party, he could not serve as an instrument of propaganda, and it was evident in his last years of life. And given the fact that he was part of a group of leading astronauts began to complain to the Politburo after the death of Korolev on the incompetence of the new leadership, there could only be scared (of the Politburo was far from the competence and legitimacy) and to take appropriate measures have to Gagarin, who was soon to become General, and to manage such a general problem for the party. It ended with the era of post-war generation of enthusiasts. But to Yuri Gagarin was [Alexander Galich](#), who was apparently contrary to be an instrument of those [who know how to](#), and after Gagarin Andrei Sakharov ...

In 1977. perfectly defended his diploma, but [on scientific communism](#), our teacher with my consent Commission suggested that according to avai characteristics should be put no higher than four, because my "liberal" views known to political department, and there could not agree with the quint was pleased that rattled off scientific communism on the coin (as it should be, almost to applause), and I was asked, and [I did not mind the four](#), sin still had 20 years to politpodgotovke officers again and again to outline in three notebooks of Marx, Engels, Lenin, decisions and resolutions of congresses next Plenum. The prospects for the next five-year plan, I doubt because lying on the surface of the facts of the progress of private initiati the Western countries and getting up to his full height of global problems of mankind. Such an attitude was not conducive to a career, I knew it, but I me it was more important than my inner freedom, once outside was significantly restricted mode, sometimes impossible or resulted minded people to death. Whoever came up with three notebooks for political studies was foreman future restructuring - through the three notebooks I have an aversior ideology took root, to the Committee and workshops on polituchobe. Time for me has always been and remains the most expensive resource person. From me and my classmates nor fraternity, nor of the rulers - [the Mamluks](#) did not work: a huge human capital, the military academies was also wa

For I was sent to distribution Odintsovo in the Main Staff of the Strategic Missile Forces, which did not run from the service, [automated control](#), predicted flight, specified the calculations involved in the introduction of the Soviet of the Internet, according to the American ideas to create under leadership of the Communist Party, where many designer realized the software and technical means of a system of guaranteed communicating comm and control signals, opposed the EU machine series computer as a network server (now these monuments bungling 100 years b FLS resemble "commanders" of their prowess in stagnant times, as foundations for these servers are not podorvesh and roadside bombs, from billion dollar project only building in 2 floors and a strong basement, apparently, they are stored vegetables, but as it turned out it was not just. servers, and at the beginning the general crisis of the Soviet system. The enthusiasm of even the righteous can effectively [implement simple bulky projects](#), but complex and high products to the heirs of a criminal enthusiasm of the Soviet system is not supplied.

Rented accommodation in the nearby village, lived for some time with no family - and wrote its constitution on the project was published in the pr Brezhnev. Looking at the face cloth officers (only rational and emotional mat was constantly smoking chief) and his plight, he decided to throw out drafts of the constitution, put down his thoughts and actions active in the social sphere, and decided to settle down. However, [only after 15 years of service in the Army](#), my family moved into a normal service apartment, reared two children, [loved and suffered](#), [playing chess](#), photographed, "[he urged the dawn](#)", but refused to be partgruporgom and other special structures [not involved](#) - this side the army, and I was disgusted with society. Superimposed and some household details. Artilleryman Solzhenitsyn opened my eyes to the Gulag, and the driver Tolubko gunner, who lived in the Gus-Crystal in the house next door, talked about the passion of Commander of women and driving a car after narkomovskih 100 grams during the w And among my comrades in the service were not a few [descendants of the guardians of the Gulag](#), quietly settled in Moscow after its liquidation. U these benchmarks I have evolved their own career strategy.

Perhaps Lenin as many utopian socialists plotting good, but the trouble came to Russia in the form of a collapse of autocracy, a succession of muti and activity of all intelligence services of the world pushed Lenin and his team to seize control of the state to create a springboard for world social-democratic revolution. Perhaps the same command on the target and the civil war in the most resource-rich countries in the period of its rise. During First World War in Russia there was no card for food, in addition to sugar, so people do not indulge in moonshine. And after the Civil War in a weak Russia (although the Russian Empire in alliance with Britain and France could implement the outcome of the First World War), [Stalin](#) and his entou through the slogans of class struggle had rejected the centuries-old civilization of the social hierarchy of society and could create for the disoriented terrible repression of the people only mode [bitches](#) and [secretaries](#) that relying on myths and undeveloped social views turned into Russia's [criminal regime, brake development of the country](#). Secretaries enjoyed special distributors and [females competed](#), who will take over at the benefits regime its position statesman (size or magnitude of the title, apartments, pensions, benefits ...), so most of them call themselves, and then continues to call ri now. The main value of Russia - Motherland, dorm ... to the person and the interests of its mass is not mature enough. I believe that the new constitu and the deployment of troops in [Afghanistan](#) on the eve of completion of the construction of communism in the Soviet Union, and the Olympic Gar 1980 in Moscow CPSU tip arranged for [diverting the masses from the analysis of the results of the construction of communism](#), for sampling the A and some of his goals for stripping the officer corps and society. For any such justice more than a million Afghans have been maimed in this war, an of thousands of Soviet men? Only softened consciousness political officer that could justify. By this time not only the southern underbelly of the US was soft, but the ruble, as in the years that followed the war for exploits in Afghanistan Government to pay by check, equated to the value of the cur for which, and sold to the heroes of the Afghan war of manufactured goods, and good quality products in specialty shops Birch.

At the end of the construction of communism fully razmyag and avant-garde, so basically the descendants of the Communist Party apparatchiks in 90s became not partisans, and turned into a "new" Russian merchants. Minded and independent person in Russia in 1980 were almost completely destroyed, and the locomotive was still but a dead end. His arrest in 1992 for the population will be a big shock.

I am convinced that the First World (disorientation, betrayal of the elites) and the Civil War (the adventurism of the Bolsheviks and impromptu disgruntled masses) were the main Russian tragedy of the twentieth century, the natural historical development was interrupted, killed a nascent civi society, the trend of the active personality and created the political administration for industrialization and management of the working people in the camp of socialism. At the same instigators of this war the German Emperor [Wilhelm II](#) lived to old age with the woman, children and grandchildren. the participant of the war, Russian Emperor was brutally put to death together with his family.

Heroes, actors (actors) era will shape the future of the country. It seems to me that the backlog and deadlock development of Russia was given the crimes and errors decoys Mr. Achal XX century.

After a huge conflict between the working class of Germany and Russia in the Second World War, against the background of not wanting to conne the proletarians of other countries, intuitively let the reins (cushioned grip) N.S.Hruschov first and then Brezhnev, who gave the country an oportur [rest after it tore from the plow to build a nuclear bomb](#) and to enter the path of movement of the objective social matter in the form of society.

[The idea of non-proliferation and the prohibition of nuclear weapons, its reduction and control](#) gave hope to solve the world's problems are not in : nuclear war.

"Perestroika" brought a certain amount of clarity, [I became its supporter](#); update the USSR and the conclusion of a new management agreement w the union republics was hard necessity. The existence of the Soviet Union in the former political and economic regime has become impossible (one party and the only common property, a socialist economy), but "the commanders and educators", for the most part could not independently (separate from tillage) think and retarded acceleration, democratization and career few supporters of [Mikhail Gorbachev](#) in the national economy, the political sphere and in the Army. Supreme Commander cautious - he himself was in his best years tool "great scientists", to the same party at the lads ended g reserves issyakshy together with the fall in world oil prices.

[Updating the USSR and the world socialist system](#) has coincided with an increase in the democratization of the country's administrative system an tough military pressure from the West to bankrupt the USSR, lectures on Marxist training officers become more diverse, often young reporters in the Strategic Missile Forces General Staff. He performed and Gaidar. employee magazine "Communist". is critical of the democratization. arguing that v

from the main path of humanity, so it's on a cautious entry into the Western world with democracy Turkish sample ... and he was right, but for some reason, made in Russia in a few years our credulous (wild) people's liberalism with a wild and destructive criminal face. Liberalism is possible the development of civil society and it matures along with the citizen, and the population of Russia under hard pressure from the Communist Party during Soviet period was suspended, kept as slaves, disenfranchised disoriented the workers, the peasants (as they say in their areas of concentration) are constantly mobilized in order to the country's survival. All areas of the country still full of structural imbalances and far from being relatively homogeneous, which can smoothly functioning market and the more developed post-democracy tendencies.

April 26, 1986 an accident occurred on the fourth unit of the Chernobyl nuclear power plant, located on the territory of the Ukrainian SSR (now - Ukraine). The elimination of the consequences of this catastrophe participated Sergey Uryvin, which for several years together as military engineers forecast in the group and the calculation of satellite orbits. In addition to service, the general we had an interest in photo and chess. Then he was sent the other side and we are separated from each other. [The general meaning of his songs of the year of the Chernobyl](#) seems to me that high technology not be developed in a socially unprepared countries. Those. nuclear power plant, bombs and missiles can be set up on the enthusiasm, but the right to exploit, develop and modernize these systems is impossible without an adequate quality of the population, accumulated human capital, a favorable environment. I believe that nuclear weapons and nuclear power is dangerous not only for unstable countries, but is one of the most important problems humanity that needs to be solved in the XXI century.

Communism did not take place and began the renovation and detachment from "single" society of the working people [of the liberal elite](#) (former nomenclature to the property), the isolation of crime in order to capture the common property, there were trade service of the lads, began the destruction of the weak; They were homeless. After Gaidar's lecture, I was responsible officers call from forces (regions) to the question "How much will you be reconstructed?" - Not less than to build a state of the working people led by the Soviet government! But everything will collapse in three days of 1995. And Russia will begin a new civil war, but not the people who have not yet matured, and their representatives from all 11 branches of power on my figurative classification.

1987. marked only extended meeting of all the officers of the General Staff is not for classes on Marxism, and for the meeting on the theme "What to do and how to resist the" Pershing holding this meeting the current Minister of Defense of Democratic Russia I. Sergeev "in Europe and the concept of Star Wars." . (by the way, his orders I was laid off from his staff, and at the same time and the Army of the new democratic Russia at the beginning of 1994, almost immediately after taking part in the election from the Democrats - paradox since the reign democrat Yeltsin, as rebuilt member Paul of the Committee.)

What could develop officers' 80s, which first asked? The officers of the army, the opposing world capital, because it is decaying, and he did not have a future of the Marxist-Leninist theory, which declares true without evidence, can not say no sound. only some political officer suggested that future ministers quote from Lenin about the effectiveness of asymmetric moves in relation to the bourgeoisie. What kind of moves you can only imagine in a terror era, but if Lenin went to the destruction of millions in Russia, the Leninists and the people of other countries to keep millions of calculations only. It ended the twentieth century, which after World War II, industrialization, social experiments and overflowing wisdom blew past social structures collapsed empire.

1987 I remember landing on Red Square light of foreign aircraft and my participation in the commission for checking the reliability notification Kamchatka test site spans of satellite reconnaissance of the US space groups. It turned out that as a result of negligence or treachery landfill for seven years received false information about the space environment, ie, test flights were discovered new products of strategic missiles, and my reports on the investigation of this case ten "real" colonels from different departments, probably with the knowledge of his generals, returned, threatening to take a Probably some action they took. Mutual responsibility, cowardice and, as a consequence of this betrayal blossomed terry color in opposition to the V Army. As fully disclosed during the two Chechen companies, although other types of troops. What would have happened as a result of a strategic company with the United States have each present a picture in their own way. If no one wants to dream, can someone and then there will calculate [how much cost us US confrontation](#).

At the same time in the wardrobe, next to my cap invested roll for printing device with some information dullness, but with secrecy. I served as CI of the group and by type of perverted by alien influences roll immediately realize that it is probably - a provocation assistant security commander. It would be to write a report on the team, but I burned as garbage. Provocation I have always been nasty, like verbal patriotism standouts political train always ready to accuse someone of insufficient loyalty to the Soviet system. However, this is my self not act like the commander - a lover of provocation after successful completion of which it appointed officers for the position. Maybe he was a good commander, but other selection criteria, he did not.

In 1988 I moved to turn on the car, under the pretext that I was not an A student, for political training - I had four. And in his spare time without the garage and his car, I plunged into the thick magazines and newspapers of the period. In the aftermath of the car, as well as about the summer cottage him I did not think, I did not have time for these fun - this is a very difficult and intense time for me. I hope that our people will be able to pass this by 2045.

Questions "Communism Is It cost great sacrifices and great confrontation?", "Who is to blame?", "What's going on?" "What are the [new values](#) and guidelines?" I was not raised, but it is vital in the atmosphere of the General Staff. Combat training was bad, the various commissions checked main theoretical knowledge to fight in the field, arms control and command and no one has publicly estimated, and the officers in the home inoculated social cowardice, were only allowed to observe the life of society and not to intervene in public policy issues. Multiple mailboxes dumped large-tonnage equipment for the transmission of two - three words as commands. (Modern Minsk factory of EU computers and spare parts weighed nearly a ton for Colonels (real ... ustavniki Marxists - Leninists, obedient tools of superior generals, ready to eat on the orders of shit) to sign any acts, and factory workers get easy money. I had no objection to the experience, for which he received blows from the military and factory workers. One needed report high alert due to the new system, and the other employees of the money for the equipment that does not meet their staffing performance. The whole industrial system is now overgrown with theft and bribery enrich themselves the new owners and temporarily solidarity with them in this impoverish nation.

Unfolded in the country the discussions led to a split in the Democratic Party and the conservative, but in the Army and other structures of the split was impossible, and the prevailing state apparatus could not work [without the ruling party](#) . Therefore, the discussion led to the collapse of the state. country was growing crisis. My favorite Karpov almost kissed Brezhnev, at this time I liked the bright and independent Kasparov. Rigid closed system social USSR collapsed like the appearance of bright individuals, and the replacement or removal of a link.

Stagnant and repetitive scene transfer nuclear suitcase hands of the Kremlin elders on TV shocked the entire world.

[KGB probably insured restructuring](#) - preparation of the renewed Soviet Union, and in any case led the lists of officers searching for a way out of the current situation in public (Democrats) and those who hindered the restructuring and then the KGB missed situation, and its structure is likely, and themselves were split after the abolition of the leading role of the Communist Party. The KGB could not have the social intelligence. Only the thought a different social order inspired fear on every sensible Soviet man.

In a situation of high uncertainty Soviet President Mikhail Gorbachev withdrew, and the heads of lower rank with trembling hands took the nuclear button under their own responsibility, announced to the world that they are not afraid of tanks and introduced, probably for the sampling and peace / source of his power - worker the people of Moscow.

However, to correct the situation in the Union on the coup plan to return to the Soviet socialism failed. Applying power in Moscow, the committee would have to use force in all the republics of the USSR and not only in the capitals. Angered by President Yeltsin and a small handful of people in Moscow have shown the extent of impending violence are likely to follow the situation in Moscow from the Crimea Gorbachev. The coup scenario.

[cause the party committed](#) in Russia and other Soviet republics were unable to constructively negotiate and gradually rebuild the country, and attempt [coup](#) prompted the collapse of the USSR and the distrust of the Army. [The people of Russia and other Soviet republics](#) began to seek a way out intuitively and naturally went hands of local leaders. From local historical time and the nature of leadership we have developed a variety of social forms of government of the former republics. In general, I think that the retreat of the coup is justified, the global trends: democratization, liberalization, human rights guarantees, value orientation, sustainable development. If they are not shaking hands firmly and they said their method strategy of rapprochement with the technologically advanced West, I would have them believe. But to return just back - or who do not want to.

. In 1991, after the coup, the collapse of the public administration, and a period of new adventures, but led by Yeltsin, I was among other officers who withdrew from the party by the issuance of accounting cards in his hands, and some veterans - careerists, redeeming the notes for personal cases of loyalty to the party, carried their party cards in ZhEKi and now confuse youth with their red flags under the direction of the adventurers of the "ideological Marxists" of various kinds.

I perceived the policy until now from the side, but after the coup stupid things in their spare time has become directly involved in the Movement of Democratic Reforms [G. Popov](#), [Alexander Yakovlev](#), [Anatoly Sobchak](#)... At the first congress [of DDR 14-15 December 1991](#) I was in uniform (decided that at least one army uniform should participate in demdvizhenii). At the Congress, I tried to convince the superintendent "Perestroika" Alexander Yakovlev, to intercede on top (probably in order to have [had no end of the year of office](#) and the Congress itself, attended by the best men the time, late in time, as well as all the initiatives Mikhail Gorbachev) that in the circumstances it would be necessary to maintain until one army to civil society and traditions in the former Soviet republics of democracy as a guarantor of peace during a heated discussion of internal political forces my fear for the premature dismemberment of the Army and the transfer of weapons liberated Republic and the People nobody heard. It seems at this congress delegates did not listen to each other, but only acted. Unfortunately, the culture of communication in the former USSR is not developed even among scientists social scientists.

V.V.Baklanov looked at me for a long moment, and without saying a word, left the Congress before - a split of its structure was visible on his face. Strategies to create a new political system was not. Load impromptu CIS. Soon, the Politburo of the CPSU members were transferred to the president their republics, heads of all ranks began to search and change the accounting year at all levels, relying on the element of liberalism, market economy standard as western democracy or Asian autocracies. Accountant prepare a balance sheet, counted and reported a loss, but to organize the people, the nation could not. Have not considered out of ignorance, that aggressiveness, dominance and the pursuit of the hierarchy - the beginning of all begin in the social movement of any kind. Especially after Darwin's theory of natural selection and evolution, social revolutions in Europe and Asia on the scene there was a gray man.

Democratic movement has not developed either from above or from below. Republic with the newly appointed president started his way out of the Soviet Union. In Russia, this time formed the oligarchs and authorities on loans for shares purchasing or seizing public property and its removal is not getting along in Sochi, and in the country - the winners in the "golden billion". I repeated the story of capital export from Russia by the Bolsheviks a 1917, under various pretexts.

In the summer of 1992. I refused to study by correspondence at the Academy of State Service under the pretext of "not whom you will serve." Although a few years our central computing center, led by General eliminate "no longer needed". Every commander or the farm foreman began to run his own way.

While on holiday in 1992, that would have to understand what is happening, I worked in the executive committee of the Russian branch of DDR, participate in forums of supporters of democratic reforms identified as the personality of Yeltsin, which was a lot of emotion from supporters and little constructive solutions from the leaders. In addition, the mossy and cowardice of the supporters of the former Communist Party activists helped support of "parliamentary" opponents of Yeltsin to organize and even then some rational sabotage actions Democrats. In August, the "battle" Colonel V.Sadc injured in Afghanistan, whom I met over the summer, with my consent issued decision of the Minister of Defense, and I seconded to a group of advisors to provide the Defense Minister of Social Affairs, which [was responsible for V.Urazhtsev](#).

Until the end of 1992 in terms of total chaos for six months I was a 3-year course of the Academy of State Service. Interacted with the Supreme Council, and civil society organizations in the process of preparing a package of "military" laws, participated in the issues of national security conference I met and spoke personally with almost the entire Russian political elite. But needs of the population and security issues were the main time. That's right under the leadership of any political force, with the participation of the state apparatus, to start to pour the nation into the global economic community then nobody could. building business Yeltsin Master walked superintendents of perestroika and began to wholesale privatization, his companions - a registration of an already divided cake state property, but the people cast off breech mask Sovieticus - surprised his own mug and began to enter the space freed Russia from the back door. Table and chairs, which was shared tidbits in 1992, and now divided. Officials of the old state apparatus began to plunge into corruption, and people deprived of the experience of citizenship during the Soviet era, was organized in groups for informal aggressive obtaining material goods.

In December 1992... As a working group of deputy V.Urazhtseva member present at the VII [Congress of People's Deputies of the Russian Federation](#) where the continuation of reforms strongly opposed Luzhkov. After the collapse of the Soviet Union and the abolition of the supreme governing body there are many unemployed people from among senior officials and experts, rallied around the Supreme Council. In essence, they fired at the Congress team of young accountants Gaidar. Famous [Chubais. I did not look](#) - young, but previously known to public administration, it could cause only the envy peers, careerists of the fraternal republics, seeking at all costs to settle in Moscow, and the satisfaction of thieves that seizing property from the power accountants started its complete state apparatus of inefficiency with which it was easy to agree on the division of spheres of influence and the total power. But most of all the nightmare Kremlin Palace turmoil hit me in the President's team action and danger of political games Khasbulatov with the Supreme Council of the scenery and the rhetoric of the parliamentary democracy in the country unprepared for democracy. "Builder" Yeltsin and his could not agree with the Supreme Council led by "Professor" Khasbulatov. Yeltsin at the end of 1992. was alarmed, his team seemed to me, was more scared. For me, Yeltsin was not the authority, but also a subtle mockery Khasbulatov on Yeltsin and his team, I'm not happy. In general, I support the course for democratization under the authority of the President, under the leadership of Boris Yeltsin, to strengthen the presidency in a country with peaceful replacement of the Soviet system of modern parliament and the system of local government. But my hopes were not fulfilled.

On the sidelines of the congress spoke to [Zhirinovskiy](#), nice to me at that time politician (I did not want to know anything about his support - he is talented, and support secondary) and to my question, "What would it take in the sun if he is elected President?" He replied that he would be able to dissolve the armed forces and to appoint delegates to the elections to the new parliament as early as 1992. He intuitively felt, and perhaps had strong support from the former KGB, that aggressiveness, dominance and hierarchy - the beginning of all beginnings in the social life of the people. In my opinion today striking personality in Russia are usually secret agents or rely on their intelligence agencies or other state apparatus. This is an indication of decline or to the limits of a shattered society, people, nation.

Mutual dislike Yeltsin and Khasbulatov, inability to negotiate and provocations against Dudaev and tied in 1992. Chechen knot. The young Russia democracy incompetent policies pushed from the patriarchal people in the Caucasus, jealously watching the actions of the state machine since the conquest of the Caucasus by Czarist Russia.

Liberal Russia to 50 million. Qualitatively new population possible in 100 years. Liberalism now - the same utopia, like communism yesterday. Russia lags behind developed countries and will never be prosperous in the present understanding of the Western way of life. Russia's prosperity is possible if a majority of its rational understanding of values, based on new principles of globalization and informatization civilization united nations. This process is complicated and mistakes can not be avoided. It is hoped that [the construction of a new global system](#) will cost less blood than trying to connect to

Young and bright reformers puts aside a mature and wise sat in the chairman's seat in front of them created by the movement toward democracy. Let they themselves do not call because they do not want to call Russia in the future. They had lost its former enthusiasm and faith in the reforms went in opposition to the immature democracy. There was enthusiastic and the people - frantically looking drunken eyes on the newly returned to Russia a social injustice and a heterogeneous opposition to activities that do not understand and a few companions chairmen. It so happened that burning desire to become a Democrat position, I, together with Gavriil Popov and Anatolii Sobchakov was in the democratic opposition and to create a Russian Democratic (Democratic Reform Movement), too, was not to the court - the game in the opposition is possible only in a stable democratic country. For the period reforms the opposition reformers should be curtailed by law, and the people and hurt them both their irrational actions. Criminalization - a consequence of a liberal approach to reform the country's retaliatory move people to incomprehensible steps reformers. Liberalism and the intensive development of economy are fading. The collapse of Gorbachev's reforms, based on the acceleration of work weary people, led to the historical liberalism last burst intense personal enrichment. The current transformation of Russia and the developed Western societies, I hope, will insist on the transfer of intensive development of the sphere of material production in the sphere of reason, will post an ideology of liberalism based on the sustainable development of innovative society. Huge material resources in the personal management thing of the past.

At the end of December 1992. "military" Minister P.Grachev was once engaged in social programs, and counselors did not show himself, they went into retirement, and ensuring the group disbanded. And before that from V.Urazhtseva deputy through his assistant, I was to make a direct proposal along with other officers seconded to side with the Supreme Council. I refused, saying that the [Supreme Council should constructively to help President Boris Yeltsin and his team](#) (link added 30.09.2013, analysis of the events of October A.Illarionovym I think is appropriate here) in carrying out democratic reforms. Soon most of the baked contradictions between the different teams, I returned to my unit in Odintsovo, where he started the sergeant lieutenant and continued on the staff. Without diligence continued service in the Mallorcan positions under the guidance of local "commanders" after three years of travel "colonel" positions, which have appointed the orders of Commander and the Minister. Now I am no longer fit into the system, I can't be in the "education" of young people, and I as a white crow nimble muddle in uniform start to lift up. I was disgusted, but also from the Army to leave was difficult. I found an outlet in communication with Astaschenko AA and other personalities of the Democratic party, Odintsovo District. People so easily mobilize wipers for cleaning around the house and "wanted to spit" on the citizens' initiative, albeit with an academic background - a habit to submit to government officials, even in the face of the janitor until higher level of civilization of the people, and likely to remain so for another long time. And to compensate for this it is necessary to introduce the tradition of re-election of various chapters.

In April 1993, alarming., While on vacation went to referendum in Ivanovo observer from the Reform Movement. ["Homeland of the Soviets"](#) had voted [against the power of the Soviets](#) of the trust to the President, but for a new course of his Government's young economists and accountants. By the way, observers from the Democrats almost beaten while at the hotel "Tourist" be far from good young businessmen from criminal organizations who felt themselves masters donated them freedom - about the danger of criminalization of the country, I wrote then, but in the executive committee RDI not given such trifles matter still they returned safely, but that freedom began to use mainly gangsters few people cared.

Once again, I decided to study, but in June 1993. As in June 1992. Command did not give me permission to enroll in the Academy of Public Administration under the President in absentia, grossly violated my rights under the pretext that there is no replacement to me in a combat operation protecting the president, it can be vulnerable from immediate superior. I tried to complain, but to no avail: my rights and "expediency", born in the hands of "commanders", a contradiction that is not resolved in my favor. In congestive Army nominated secretaries and all kinds of [staff and non-members vigilant comrades](#). Probably warrant Paperwork parts of the central apparatus, devoid of warehouses, most of them recruited in secret counterintelligence agents and happily reported, and if they wanted to, even slandered officers. All of this weighed on human dignity and caused distrust among the officers to the destruction of the Army, when it merged with the personnel of the surrounding gray mass. Near me many comrades in the service received "his colonel's epaulettes to his gray form. And the most smartly saluted for command and control of automation and communication achievements - the right of general for the same gray uniform. Create and extend their network and the KGB, its "woodpeckers", as a rule, offer a sensible career growth and preferential material means: flat, car, vouchers ... In general, the whole country from small to large has been covered with empty oaths of allegiance Communist Party rate does not prevent steal, get drunk, lose value orientation and since the 50s after recovering from the war hindered the development of the country, controlled by the citizens initiative, and during perestroika burst KGB knock on the relative "woodpecker". Oaths and promises to give the best to God.

[After the drama in October 1993](#). When adventurers animated scenery of Soviet power (the Supreme Council without the leadership of the Communist Party) and tried by force under the guise of parliamentary infringes on the old scenery screw in the reform process their interests, I could no longer passively participate in an event.

On its own initiative, I put forward a candidate for deputy of [the Russian movement of democratic reforms](#) on 111 Odintsovo district, in spite of the "persuasion" of the main caregiver of the Missile Forces and the total absence of support from the executive committee of the Democratic Reform Movement and the so-called constructive opposition movement Boris Yeltsin. Russia collapsed after the Union was undemocratic and developed an intuitive way. The people need a lengthy constitutional process for the determination and accumulation of its values and fixing the generations of civil democratic society guidelines and develop skills for the sustainable development of their regions.

The first free elections gave the "Russians" a new constitution, and me a real sense of the level of freedom, and the general political culture, the role of the administration, the proportion of democracy and individual rights in Russia, the degree of readiness of the people to the Western experience of liberal democracy. In our district won [Lukin](#), he liked me at one of the joint actions, but we are shaking hands with him, much more is not met. Calling his "Yabloko", they only confuse poor political consciousness of the people.

For me the [important thing was to](#) participate in the leaflet and therefore I have included the phrase "Vote for the Hero of our time ..." and strengthen the crowd reaction, divided the total pie. These were the first elections of yesterday's slaves, worse than slaves, who were allowed to own property .. opinion in particular and that, dropping their social masks, want to immediately become masters. Communist carnival masks from the dictatorship of proletariat is over, citizens have revealed their faces and started to free life. Many shuddered, the moment of truth has shocked many, and they want to go back to the previous carnival, but alas ...

Any constructive activity at that time was for the benefit of the emancipation of the population, its freedom, democracy, and to the detriment of the heroes who risked defend common rather than their own interests The accelerated development of the western way of life and the constructive activity of the people, their civil position in the various trade unions, parties and movements, and may now be the only condition for our success in the future this we need to direct social management on the unity of the people, understanding their problems, their constructive solutions in the field to meet the challenges to improve the quality of life throughout Russia, not confrontation with each other under the guidance of irreconcilable fighters and ardent revolutionaries or their grateful descendants? Only after the social and professional problems in the team, the enterprise collective solidarity born of the people, the social base for political solutions to society's problems. In the meantime, the people selling opportunities for its quality of life for the sake of envelopes and cheap vodka, from which can not refuse yourself.

Of course, the Democrats are not united, because after all, a tough union Bolsheviks led Russia to prosperity. Let decades in a presidential republic party fold, [but rather the elite ...](#) not to fight for power, but for the competition for the right to a 5% improvement of Russian control in the next five years of the XXI century with a smooth transition to the middle of the twenty-first century to the general elite reasonable people individual state and at the end of the century to a reasonable social order on Earth.

At the end of December 1993. after the adoption of the new Constitution of Russia with a focus on the individual rights of mine, rather than collective (community) as in the previous. "the commanders and educators". inspired by the defeat of the "democrats" in the parliamentary elections. gave me ...

denied. [Began baiting objectionable](#). (pack of abandoned "bitches" were ready to break any ..., said the new owner, which fortunately at that time did show up and I had the hope of the emergence in Russia of innovative self-sufficient individuals with advanced horizontal connections).

In January, 1994. I am again out of order "without a team." In the local elections of Odintsovo "commanders and educators" already snatched from hands of my petitions (whether they knew that thus clearing the way to the other governments, few subordinate entities of the hands that they do not to tear anything. So it happened later - one of the largest armies in the world can no longer protect his people from their same crime, and even supply with trained personnel). They naively believed that as a military man I should not actively use their right to vote. [Still it was necessary to vote on the team, just like old times. being the systems on the polling station.](#)

In February, 1994. after several years of participation in the democratic movement and the struggle for the adoption of the new Constitution of Russia to the direct action of articles on human rights, I was discharged from the Army, the new Russia with the manual, but for 24 hours as a warning to [standing](#) in the ranks of the current "tradition," which does not spare no astronaut, no first minister ... saint. Public administration until empty value systems, it is not even from God, but should be such that the values of the person and the state apparatus called the Christ, which is there the "sacred power to crucify "in 24 hours".

We must move away from "traditional concept of leadership" God is based on the will, which before the coming to earth of the Son of God, the people were as omnipotent Creator, the formidable Judge dwelling in unapproachable glory. Iesus Hristos gave a new concept of God as a close, merciful and loving Father - "He who has seen me has seen the Father" - said Iesus Hristos (John 14: 9). And despite the power of the word in the Bible in various combinations of several hundred times. The situation is similar in our Constitution.

Some officers of the army of slaves envied me, others began to see how I can help my spiritual father in this situation.

If in my place was a soldier, who decided to show civic initiative, it could kill your feet comrades, sergeants, warrant officers and officers in this situation could remain silent. All this is compounded by the collapse of the old Soviet Army in the absence of any steps in the construction of a new democratic army. Chubais and Gaidar apparently believed that the market and the army itself will create a new relationship, when a senior will not be his ass younger (see the film Mikhalkov Blinded by the sun).

My volunteers of "reform movement" were in a worse position, and we could only mutual sympathy and hope that democracy hold out in Russia and the new laws will not let the people again immersed in the filth of poverty and unemployment tear and fledgling democracy with its constructive opposition.

A week later, the military prosecutor of the Missile Forces four o'clock trying to convince me that the dismissal ["decorated"](#) correctly (ie public administration machine, which link and it is moving in the right direction) and go to court should not be to protect their rights. I myself do not want back to ["fighting friends"](#) with diligence helped "commanders" to check my military training and to issue dismissal from their ranks. And this is after years of joint military work ... They [are honest](#) officers, and how all the population in no way to blame and I have them too and forgot today in 1996 some say the greeting - [God will judge them](#). Some continue to be ... a free and democratic Russia, and many fled from the army for one reason or another, without waiting for reward for his zeal in the service of superior officer. Former activists and partgruporgi, KGB officers traded in markets, employees and rigid methods of operation up to the assassination of former comrades who have now become competitors in the business. In the event a rollback of the system as they could once again hit his chest and go to the activists of the fighters for the rights of working people. Russia needs a core of the officer corps of middle-class professionals for the soldiers and the accelerated dismissal of generals coarse animal face. But the middle class continues to accumulate resources and smuggle them abroad, and professional soldiers, few people go.

Russia continues to be in the dark ... national boundaries, customs and free internal markets. "Business people" using today's conflicts continue to plunder the country, pickpockets central regions have settled in Moscow, and people continue to die of drunkenness.

Control Mode Army by the Communist Party ([the cornerstone of building and destruction of the Army, the organizer of all the victories and defeats](#) under the supervision of [the KGB](#), kontravedki and personal initiative of commanders for inspection by individual subordinates impeded the development of the male population, replacing the initiative and thought warriors, abstracts of primary sources, congress resolutions and parties distaste each other, internally organized in vertical chains of ["empty"](#) figures in uniform, able only to look in the mouth or the authorities to suppress pochinn more In order to fight against their own people. Curb free and independent outside Marxism-Leninism and thinking of civil intellectuals. Horizontal relations were scarce and caused the suspicion of their initiators. In the barracks three "comrades" could beat the fourth and the remaining 70 all have learned to ignore it (the experience of the war in Chechnya confirms that brave 3-4 may forge or destroy a company). [Society still does not like their Army](#), their officers. Tens of thousands of conscripts evading service, and another Army Russia does not have. New Army officers and new born on quickly in the blood and the victories, slowly straighten the situation can only be the world for decades, a lot of money and adequate time to military personnel, but neither one nor the other to us who does not give enough of them. There is not even teaching materials, and interpretation of the Constitution for a warrior. "Treason" tired and disoriented people will cost Russia, and possibly the birth of new blood and new ... Army of competitive industry (unfortunately only famous ["Kalashnikov"](#)). Blood and a lot of people, but to pour it less need talented generals for victory and not just the military. Party cells were not working against crime - there is now authoritative and informative person.

Despite the years spent in taking care of me from the Communist Party, I would like to be active, and after his dismissal, but the Supreme Command at the time did not consider subordinates. Activists demdvizheniya newly emerged personnel officers from Democrats staged test tests of aptitude for Western tests, the mass movement of free people frightened leaders, accustomed to working with Kholuy minority and resigned majority, and elbow among the new "democrats", who believed that they and so many and sofas near Yeltsin's little, I did not want to. He remembered, as some political training honors our commissar proved that they are different to other honors. Current Democrats began to say that they are more democratic than old Democrats. Apparently, the quality of the population is such that we can now only on third-rate success. Appeared "demshiza" terms "dermokraty" and one of the forums of democratic forces Smirnov announced request for troops to come ... and then said that the military came back and did not speak command, where they were: I was disgusted. There has been a clear policy of containment of political reforms. Yeltsin with Gaidar and Yasin, apparently focused on the economy and refused to support the mass democratic movement. It was like a betrayal. Changes in exchange rate during the democratization of the country once again to divide the population, destroyed the first stirrings of social capital and civil society. The media began to compare Russian democracy with developed democracies, frightened errors active citizens. Theorists and sissy were stronger and destroyed the germ democracy from below. I forgot that no manure will not yield. And it was necessary only to strengthen the police and the democratization of the country to carry out special methods of transition. Thank God that I did not come from the Far East to the forum and I had to go back far. Maybe that's why later, "Far Eastern republic criminal", and all social relations began to develop under the criminal scenario. For example, instead of pro-democracy activists Dudayev advisers Yeltsin their inept actions turned into militants, uncontrolled federal government armed groups in the mountains of Chechnya

The executive committee of the [Democratic Reform Movement](#) were hardly able to solve only their own problems, with the level of "revolutionary" the executive committee in my estimation was lower than the average of the Party Committee of the collective farm of the late Brezhnev era. Reject the political leadership of the leaders of "perestroika", failed to create a moderate and organized democratic movement, was sprayed on the opposite forces to each other. Those who stand and what you did not understand, were scattered, and at the next election they bypassed the "Women of Russia" Then they withdrew from constructive opposition in the garden or have left for foreign countries with stories about the situation in Russia, where many nations and nationalities were freed and weapons to boot.

The process of establishing internal and external relations went ... And in fact pouring into the international community at a time. Leave those who have managed to privatize the choicest pieces of the pie. All this slowed down the development of the new society in Russia. The population consider themselves cheated the liberals.

In Russia, the party began to emerge of cheap sausage and cold beer lovers - "Men of Russia", the supporters of the company "Uncle Bens," promised to fill up rice and ketchup, "prepared" to nominate a representative to the Presidents of Russia and collected signatures in Petushki. DDR leaders who are in a constructive opposition, I was not fit. They separated and began to compete with each other. Do not get a decent place in the governance system, they are in opposition to the cottages or become passive and throwing democratic structures, traffic - thousands of active Democrats essentially were cheated and betrayed even worse. I did not come to businessmen, there prevailed a crime, and the failed public policies for poorer drinker pollock.

The case has led me to the Moscow mayor's office to a leading specialist and favorite work [computer consultant](#) . And in the autumn of 1994. I teach the [basics of using a computer](#) .

Being in a position of personal structurally sow grain of eternal good ... for rolls, pies with cabbage, which will bake ever in Russia to import. [Per this will be citizens of 90 years of birth](#), were born as a citizen card for global economic management, not the worker, a tool for building communism in one country. Recommendation, which gave me Gavriil Popov, toyed with the assistant business manager of the mayor's office and probably threw in the wastepaper basket.

Not the first time I left the companions and not much upset, he continued to teach.

And my former "commanders", having won brilliantly with me, strengthened discipline, increased combat readiness and "honest" got the rank of general, and when war broke out in Chechnya, silently watched the "valor" of colleagues, a triple ring of division forces surrounding a company in the village taking aim at each opponent, and then after the application of "Grad" on the village, passed through a "misunderstanding" them out of the full view of the public around the world. My former bosses change their pants with stripes, chairs to a larger size for their asses, and rejoice in its structural inaccessibility. Some of them gave, and still give advice to senior management of the country, but watched in silence as the other generals, "power" : only an abomination of lack of professionalism, but also for the participation of criminal groups in the elections of heads of administrations. They have won their stripes, continuing the tradition of the civil war, [for the rigid guide subordinates in time of peace](#) and conciliation with the leadership and the generals of the military-industrial complex. And since I have the body control consultant, then allowed to grow as a sign of rejection of the situation [beard](#) .

Symbol Reform Movement - "Buffalo" or "Cow", probably accurately reflects the state of affairs in Russia, which have a long "chewing" [the value democracy](#) , and in the attack "Wolves", everyone is entitled to rely only on themselves. Advisors wolf hunting in our country guiding young accountants are missing, and some of the candidates to assess their skills with puny Suvorov and put next to impossible ... for the power offensively.

After the confusion in 1996 and forced the extension of the powers of Yeltsin in the election I was able to relax a little and expand the project "Millennium Academy in the Internet", which is supported by the deputy N.Moskovchenko, but officials from the City Hall project information hub braked, and the team was not able to persevere, and I did it at his own expense. I believe that the restructuring of the Gorbachev and Yeltsin Transformations objective process of social movement, painted Russian stupidity. That's what I appreciate this period, and who and what is said or done in the years progress of social system in Russia is not so important from the historical point of view, if there were no obvious crimes against the individual.

At the present time (1996) in their curriculum page - ["WORLD Boris Mayorov"](#) trying to show problems of change and find solutions to secure entry into the world market and arrangement of Russia in the world community of developed countries. I believe that life is unique, and the person's identity and the basis of the whole archaic desire for power and very chaotic power in society, it is time to explore and transform into [a civilized management](#) . Only control through law and solicitors (law enforcers), corrective behavior of the person according to the law if necessary. Lingering violence against the person for thousands of years - the main trouble for Russia especially. Eliminate violence can be realized that the social fabric as well as the whole material world exists in the movement by expanding in all directions. Linear design or purposefulness thousand-year Reich, Communism, etc. impose due to the above mentioned basic properties of social matter. New national heyday or the greatness of Russia in the United Nations family will form gradually, if the leaders will learn social management. May soon make a breakthrough social science, and yet out of the crisis and integrate into the modern united nations better for Russia as a whole. For the independent entry of individuals to the privatized property is necessary to urgently prepare bill and then yesterday's slaves will destroy your mother - Russia, the society does not revive, and then into the global community will only open spaces which are still considered to be ours. For cooperation with Western Europe, we need to forcefully develop and implement national adaptation programs otherwise there will be constant skirmishes.

I am fond of [computer](#) , garden, bicycles, chess, social processes and problems of [national security](#) Russia during its entry into the integrated world stage in Russia.

The party does not belong to sympathize with the social- [democratic](#) public associations, the liberal dream of a device of our country in the future global century and try to survive in the real Russia to pay [the teacher](#) and share "HERMES-UNION" instead of the voucher, solemnly handed to me in a house with a large commission officers high leadership at the behest of young accountants - reformers. They are good guys - young economists, except that somewhere miscalculated? Their time will come, probably after 2008, and I will choose them according [to your criteria](#) . Just to survive. Privatization was like a simultaneous game of chess with the masters. Many have not guessed at what the course of the game in the privatization was.

Back in 1993 I was one of the few used the PC to operate, but a special committee of my comrades in the service appointed General Esin, checked in EU practical computer applications, and invited him to fire me over the poor knowledge of the way it has guaranteed the combat command and control systems and nuclear missiles. I "kicked out" to retire, Esin was a great general, and soon happily retired, leaving the television reports about the start button for about safe vzlotah missiles and Commander of the front of the monitor IBM home personal computers.

Experts believe that the cost of the seamy side of fighting is horrible management. On overcoming the missile defense system and hitting the target reports are not removed, our citizens are not gentlemen, and they did not spoil the report with the results of their voluntary-compulsory investment. However, they are no longer going to work on a new career officers and civilian officials of departments, folding your starting capital to start-ups of various projects that people can not yet, and does not want to control.

[Russia froze in anticipation](#) .

Often exchangeable "team" of Boris Yeltsin, acting under the banner of liberal democracy could not stop the country's slide to disaster, because of wrong problem-solving structure through the economy, morality, personality, family and the state as a whole. Liberalism today promotes a separation of forces and resources from Russia to invest them in effective places the rest of the world, and this only accelerates the crisis for the present-day Russia. Only through a spiritual rebirth, is gradually realizing its [value](#) , most people will be transformed and will be able to travel from Russia to the Canary Islands for a vacation. [How to get there and how long to wait again?](#) Hopefully, that will understand.

Married, two children.

[Sociable character](#) , smooth, without bad habits, required practically healthy, almost optimistic.

I am looking for a sponsor for the publication of [his lectures](#) on the basics of PC applications.

What is there to do? [Steppe and steppe around](#) ...

1996g.

Since May, 2002. I decided to continue the text in its history, leaving untouched the previous paragraphs.

extension

were able to survive, not all.

In August 1998, Russia announced its insolvency. Only family and work of the teacher helped me to survive.

Russia is now in 1998. does not need accountants, everything of value was privatized. Liberated capital flowed in their effective application area. I almost on level ground, we need everyone's efforts and [TOPS](#) capable of organizing creative work of the nation for quality of revival every [individu family. and Russia](#) as a modern state with a daily and careful integration into the world community.

As long as the world began to take shape Sverhnatsiya as an effective global framework for the free movement [of people, ideas and capital](#) to the greatest satisfaction of the calculated and transparency requirements in some of the global world of the cell according to the UN literacy or similar structure. Excess of the calculated capacity development will be blocked sverhnatsii elite. Will this transnational elite to take the rest of the nations c world?

Careless Russia's entry into the global market economy, untrained people and scorched communist ideas initiative of the masses of the central Rus has led to an incredible injustice - depriving the masses of the common property, and through this to the decline in economic activity of the populati the impoverishment of the country and in fact the occupation of the peoples of the borderlands, where all Soviet times, many continued to keep his f of sheep, have your business.

After the failure of elections and repeated in 1997 of proposals for the organization of the supporters of Reform Movement and the Social Democr [through the internet site](#) and visit in February 1999. 3 Congress of the Social-Democrats of Russia, I suspended his political activities and engaged in their favorite computer technologies. New Gorbachev, surrounded by an unnaturally active young assistants (probably due to the KGB), who took th lead of the United Social-Democrats did not believe Russia, although he earnestly set to work.

For example, Yavlinsky or Boldyrev came to my mind more on the role. In addition, the new head of the executive committee of the Reform Movement, probably detached from the former structures of the KGB, Mr Rydkin refused me in all of my computing initiatives and relied for their a to the social democrats site <http://sd.org.ru/>. By this time, dried up enthusiasm for change and our population.

And on TV and in the beginning of 1999 continue to show the Commander of the Strategic Missile Forces on duty in the daily form of an office d with a household or school computer. Behind him, 10 tons of relay equipment in an armored command and control type of "noodles" cable that does circulate much more than three Russian letters and three Arabic numerals. Beside him my former bosses in stripes that stroke of the pen on the acceptance certificates were buried in the ground a lot of money for the [command and control and communication systems](#), and is still surrounded b unquestioningly devoted his aides expect the first tree seedlings in the fruits of command and control in the field of its activity Wonderland. Howev these fields were around many of the collapsed empire man manager hopes of paradise among the inefficient and cold Russian spaces.

At the end of 1999. "great builder" Yeltsin made incredible progress - handed state wheel [exhausted perestroika Russia](#), not the hero of Russia, not . General De Gaulle, as did the French and the lucky and neutral officer of his unit, Lieutenant Colonel stock intact rearrangement of the KGB. Perhaj of desperation, but then someone has created a version of that and it has been conceived. If we all thought over in advance ... but Russia to such a str should go, go ... and sometimes run.

Russians against the background of a consistent sampling Army and the complete lack of security - explosions of apartment houses and the prolon anti-terrorist operation in Chechnya were dumbfounded, took this decision and chose the President of Russia Vladimir Putin. I voted for. As he hims Army Major ran for the State Duma in 1993, when the generals showed complete confusion, and sometimes cowardice. State to fulfill its basic func to ensure the safety of the public and the glory of God that is not headed by a former corporal then Russia.

In 2001, I was held incomprehensible campaign against Berezovsky and Gusinsky and owned by the media, although the economic harm from oth channels of advertising in my opinion at least.

After the terrorist attack on 11 September 2001 in New York, I had solid confidence that the beginning of the transition only after the total ban on the secrets start to the new system of the global world order. All secret services in the world should be banned as a chemical and bacteriological wea Any discrepancies, all the distortions in the identity of products and organizations should be prohibited as well (for example, the party or the Liberal Democratic Party Yabloko should wear appropriate entity name). Until the early adoption of legislation in the majority of modern states, I do not bel any of pious to agreements of any presidents. Everywhere lie. I hope that in this I am not alone. Along with the overall organizational problems seen solve the problem of unlimited enrichment of national and transnational elites, reorienting it to the other values, and publicly released resources dire to the development of the world's population.

2002. Supreme Commander found the money to pay the normal Army, the military began to respect after a decade of neglect. For me this is an important move of the President - a full-time security officer in the recent past.

It would be good to great Eight agreed in the near future about bringing the army officers for the inspection of states, corporations and individuals open them under the law. Val secrecy, secrecy, war and crime of a different nature overflowed civilization. [Only for 2001-2002. to](#) behold the memb my family and myself was cleverly robbed a few seconds during the day on the street well-dressed older than me [pickpocket](#) working a deaf-mute al looking shop outerwear or workshop on tailoring ..

October 23, 2002. Chechen rebels seized 800 people in Moscow, Alla Pugacheva boldly entered into negotiations, and is still able-bodied Boris Yc and Ruslan Khasbulatov reason or as not evident; for example, could offer themselves as hostages instead of eight hundred Russians and guests. For Yeltsin, the move would be stronger than the will of their political "squiggles" Vladimir Putin. For Khasbulatov demonstration of civil courage and acceptance of opposition errors Yeltsin in 1992-1993.

Today, February 23, 2003 [for the first time over the past decade Russia worthily](#) celebrated their professional holiday warriors, defenders - the anc and noble profession among wicked people who, unfortunately, unknowingly hoarding their problems, and then forced them to allow in wars.

Maybe this noise about the holiday is associated with the imminent US war on Iraq - the brainchild of Party policy, which will be responsible for t mistakes of his older brother. Hopefully, after the defeat of the Iraqi regime in Russia will inevitably occur events of repentance and purification of t burden of their mistakes of the recent past.

April 17, 2003. killed deputy Sergei Yushenkov, nice person to me, and politics. So fate decreed that our paths crossed, but a closer look was not possible. From him I adopted the name of "radical democracy" when the cowardly officers in 1992. I was asked about the political orientation, I there in the face that I was "radical democrat" - now unfortunately such an answer I can not afford. It is a pity that there is no place for radicals in Ru ... They are almost always interesting people.

Lawlessness kills Putin should be stopped, otherwise the Russians will drench each other on any occasion and in private, walking during the day a night with a bottle of beer with both a sword.

18.09.2003 of the year for me suddenly began another restructuring.

While in the hospital at the estate accidentally discovered that the difficulties with breathing, not only from an injured nose, but also on the critical extension of the aorta and left me to live with this mine in the breast is not more than 1-2 years. Guide departmental hospital in Pleasant discharge m independent advice. The clinic №1 I was sent to the commission for admission [RNTSH](#) where me no options have announced that this operation is v ~ \$ 7000 in the case of the operation will immediately pay. No other options I do not advise. I'm interested in their commission functions and rights , patient.

For 23 years of service in the Russian Army, and almost 10 years in the Moscow Mayor's Office failed to save money. Pension reserve officers ~ 3 rubles, consultant salary for Information Technologies in the City Hall and the Government of Moscow ~ 7000 rubles, my initiatives in site building profits has not brought. Our union can help no more than 500 rubles.

I figured out how serious my situation and who can make the operation cheaper.

30.10.2003.

On the advice of an expert from the medical insurance company Max-m son appealed to the Ministry of Health and has received a letter with the request to make the operation of the budget bill. This letter I carried her to the commission for admission at RNTSH, where I was told that the center branch state employees crowded and cause me over the phone when my turn will reach. I wonder when?

[Figure patients failed rights](#), and what are the functions of the commission will find out. Reference Commission does not, in clinics and hospitals doctors have taken a defensive perimeter of a natural market. This happened in all spheres. To establish rules of the hostel in the new conditions like 20-30 years.

My generation after the stage of rapid privatization of Chubais' plans were robbed by their (our) countrymen. And now in the country matures a new civil war, and the market prices of entrepreneurs attacking budgetary pockets of teachers, doctors, soldiers and other employees of the state apparatus. Need to do something. Surgeons and their patients, teachers and students, the military and civilians of modern Russia should interact harmoniously with each other in the Russian legal field.

In our Odintsovo district only one candidate for the Sobakin know what to do now. Son shall ask him for an appointment to appointment.

02.11.2003

On the weekend after a busy 45 days of hospitalization found just about right:

- [Department of Cardiac Surgery Institute of Transplantation](#) ;
- [Russian cardiological NPK](#);
- [Scientific Center of Cardiovascular Surgery named. ANBakulev](#) .

Due to the all-round defense, these rules have not explained to me once appropriate surgeons.

The procedure for providing the population [of high-tech medical care at the site of the Russian Ministry of Health is not active](#), the same site did not find or it is not for the Moscow region.

Everywhere on site reports on the division of billions of rubles for the treatment of the Russian population, in a given region, and action schemes of individual patients with different social status and no purse. Forced to live and act according to the ideas among the many Russian citizens and doctors with patients.

07.11.2003

Only that the program Freedom of speech to me and other voters offered to accept their fate and die for a better future as well as the return of the money in the budget because of the extra-legal privatization schemes in 90 years will lead to greater troubles. Nemtsov called on him to believe and with enlightened eyes, as the Russians, impoverished, dying from disease, cold and crime, according to the SPS leaders, it is necessary above all to be afraid of the arbitrary prosecution and prison.

He wanted to believe that the brothers oligarchs once earned himself enough money to teach in a bright future and make us. True, I did not agree. I would like to learn to make now, and not wait for the saturation of the oligarchs and all the structures of all 11 branches of "power", would be hell to it.

27.11.2003

[I wrote a letter to the Minister of Health. Interesting answer someone from the Ministry of Health?](#)

12/05/2003 I received a letter with the request and voucher for consultation (hospitalization) by the Moscow Health Committee, [I wonder what this means ?](#).

9.12.2003

Summed up the general results of the elections to the Duma. United Russia, the KPRF, LDPR and Rodina won the hearts, stomachs and heads of citizens.

I assumed ATP collapse of cowardice against the oligarchs, but did not think that Apple will go down in history. Chubais and Yavlinsky now with friends to fight for democracy, and not to declare their clever ideas and automatically running macro-economic models in the event of their application. He collapsed their foolish hope that in their cottages for the fences, they will continue to watch on TV for the flowering of their model of democracy Russia.

Of course, I voted for the party Union of Right Forces and Lukin from Apple in our district, even though he knew that was the last time. Right-wing political culture and the conductors of these ideas sorely lacking in Russia, and therefore an easy victory in the foreseeable future will not be.

Nadoyus Putin transforms the Communist Party, the motherland and the other left-wing forces in the party New Social Democrats and Unity together with Yabloko, SPS and other right-wing forces in the party right-wing statist.

We should stop deceiving the people with TV screens scoundrels from philosophy, political science, sociology, economics, history and other humanities. Let updated on 5% of science policy and economic model of modern Russia offers a year before the election Academy of Sciences after closed discussion, and the elections for the implementation of the 5% fights one of only two political forces, and always in the interest of the people! Even if people make a mistake, he will survive 5% loss.

31.12.2003

Charity website [www.xim.orthodoxy.ru](#) our studio for 3 years of its serviceable and zealous service of boiled spelled played a role at the request of priest. Michael closed, open again under new and more accurate name [http://xim-i.narod.ru/](#). Case based on the story [of Pushkin ...](#)

16.02.2004

After paid consultations in various medical institutions in the amount of 15 000 rubles, the paper company my treatment and the actual delay in the issue of a particular hospital in RNTSH, I have collected all sorts of help and went to the Research Institute of transplantology, where agreed with the head physician for immediate hospitalization after 03/08/2003 on a budgetary basis with payment of import prostheses, medicines and essential services of care after the operation, which amounted to 35 000 rubles.

Maybe bad son asked, but the wealthy citizens are not willing to help me with money and I decided on the most suitable option for me. Had the opportunity to wait for the queue for surgery at a military hospital in Krasnogorsk, but there is the question of hospitalization was delayed because the military surgeons should have been given the same money plus their trust, I do not feel them.

Soon I will have a heart operation. It ends the second five-year plan my selfless, teaching apparatus for the Duma, the Mayor and the Moscow Government. During this time I taught up to 2,000 employees the basics of the computer device and the application is not received any letters, any increase of "service" or congratulations on his teacher, nor the service housing. My requests and applications for housing in Moscow went unanswered and I continue to live in the suburbs in the official Ministry of Defense housing and daily for 2 hours to get to work. There is no law to a reserve officer who served in the in the \ h 77866 at Moscow K-160 Bole 20 years and has more than 10 years in the City Hall, to give housing, as I said the trade union committee of City Hall. In addition, the official housing in Moscow is given only a janitor, and programmers are not supposed to. And the publicity this matter is not on the agenda. Democratic Movement G.H.Popova first mayor, and my participation in it has not yet brought visible changes in lifestyle. Most re-commit ourselves to the authorities, once again contribute to the widening of old ulcers on the body of Russia. They do not fight the Russians and thus they do not have for their rights. However, my struggle has not given me a lot. But if many have been active, then we could have a lot of crumbs.

08/03/2004

In 1999, after the collapse of the democratic movement, I met with the Orthodox Church, created a website for the church of St. Ilii Muromtza Pechorskogo, helped organize a computer class for children of the garrison.

The Church is now recovering, expanding its sphere of influence and enter into economic relations. After several years of cooperation with his father Michael from the temple Ilii Muromtza having second thoughts, that the condition of Russia's revival and purification of her spirituality is the democratization of its internal relations, updating the principles of managing most of the Orthodox Church, with its approximately cautionary economic openness, the transparency of its budget as a whole and each parish and the monastery in particular. The newspaper "The town of 10", manufactured the temple Ilii Muromtza never publish a report on business activities and only invites constantly to the temple on a high salary cleaner and seller in candle shop.

It is a pity that the [code of moral principles and rules of management](#) adopted at the final plenary session of the VIII World Russian People's Council addressed in the first place world, not currently in this matter, as is evident from the Regulation, is not going to lead, but this plague without the exit of the church as the corruption, bribery and inefficiency of governance can not be stopped amid disappointment of broad layers of the population in existing system of social management. Yes, and our population is adequately established social management - wealthy citizens are in no hurry to do to charity.

Although surgery on my heart predicted success, said goodbye to the family and ordered in the event of his death set only Orthodox cross at the local cemetery without the fence. Privatize anything if life could not, and the part I do not need after death.

17.05.2004

Two months after the operation on [my aorta](#), I restore their physical and creative abilities; I admire the successes [of modern medicine](#) and the abilities of our [local surgeons and physicians](#), and I thank the Lord for the gift of a few more years of life. It is a pity that the government has spent a lot on war against imperialism, rather than internal development and education of our people. The world was again at a loss before the new wave of fanatics after fascism and Russian communism. Russia after the conflict of the twentieth century and new disasters if not avoided, can not become a [civilized nation](#).

22.08.2004

Today, the day of Russian national flag picked up information bulletin command Vlasikha garrison and wrote [a letter to the President](#), the defense of national values.

The people in the era of stagnation lived my true, plant life gardens and villas, has not fought for their freedom and a democratic state apparatus did for him did a handful of heroes at the peak of 1991., Who won freedom and democracy, did not destroy the old elite, as horsemen and made a hog wall at the call of Lenin and [Stalin](#), and left their posts without any conditions the former nomenclature, boasting that the children of the cooks they have become educated elite, ie, in those who destroyed and created the Soviet Union ... I hope that the wide latitude for the development of a democratic Russia will give a greater effect in the near future will be the NEWSLETTER edit young editors prosperous Russia, built without destroying the pre-elite. Although reasonable limitation of freedom, in my opinion, useful. Since Russia easing threat to freedom today is just as real as the dictatorship before. In ten years, if not freedom, then the potential of freedom has grown and continues to grow.

17.09.2004

The shock of the terrorist acts in Beslan wrestlers and with them begins to take place. I hope to hear from more of our statesmen and politicians, that the country at the present stage is viable for its citizens: healthy, working, wealthy, free, family, spiritual, loving, protected not in need of housing an other property. It seems as long as the control unit continues to work on itself, leaving people to fend for themselves, while trying to extort from him the resources.

21.01.2005

Citizens of Ukraine will greet their president on Independence Square. I really wish the peace of accelerated formation of civil society in Ukraine, the USSR were built 80 years of community workers, not citizens, which led after the collapse of the administration of the working people to the detriment of all productivity. Only a free man and a citizen in the naturally formed below a democratic society could work productively in the twentieth century.

30.01.2005

The other day I saw on television coarse animal face general who among tanks, reported about the victory in just over two days locked in an apartment on the 4th floor of five-storey Khrushchev amateur armed groups. A week earlier armchair generals among Panzer Group reported about the victory during the day over the five volunteer military opposition groups, locked in a private dwelling house.

After that, go to scenes of coarse animal face regional officials vertical control six months to report on readiness for monetization, which was initiated by the builders of communism rallies across the country, creating a set of barriers to pensioners in receipt of compensation; personally for me and of veterans of the Army, forgetting all. After heart surgery I do not get subsidized medicines - there is a pharmacy 7 central Defense polyclinics buy at own expense - it is believed that 300rub. out of pocket I still be able to get ... and probably someone to give. And it happens, how do I explain the doctors, because there is no opportunity to establish accounting and control in the clinic Strategic Missile Forces. What here to speak about Russia, officials do not play chess on the computer, and the "goat" in dominoes and can not organize an elementary account of social cards of every citizen. This after the census and voting when the amounts are subject to database population and then, apparently, are released - our accounting bureaucracy anything.

End news stories about the lighthouses of Russian privatization, continuing to spread resources of the people, to export abroad the capital and ruthlessly exploit citizens, importing goods into the country at world prices.

In addition, the Supreme Commander for the whole world, said that he was ashamed of the manifestations of Russian nationalism in Russia today, yesterday morning by me formation passed the separation contract in full combat gear, a third of which was smoking in the ranks on the go (disciplined among the contract to create more difficult than finding money to pay for their work, and this is another reason that forces a coarse animal face general to cling to call disenfranchised young people, and a new elite did not fear for their capital and against the backdrop of a weak army and other undisciplined structures export values in affluent countries).

I believe that if the Commander in public will be ashamed, and his Government inaction, these and similar coarse animal face generals led the army disenfranchised soldiers at the direction of his native intelligence agencies will eat it as eaten before Mikhail Gorbachev. However, this at this stage Russian reforms can not be over and create vertical military and civil administration could plunge the country into chaos and control of military coup coarse animal face generals and intelligence agencies in Russia a lot.

Strong Army, free warriors need only sovereign people of Russia, which is no. Modern, adequate present Russian Army does not need today's rule regime, and it will prevent it from upgrading. And the appearance of strength in the Army in the absence of a developed civil society and authority in other governance structures is almost always fraught with military coups.

In order to strengthen the company ought to be in the background of governance system of monetization and restructuring, to borrow from the developed democracies, and rapidly create vertical and horizontal national unity, social justice and the active free rations and privileges of citizens, gained strength in the incubator of democracy would not allow rob yourself and beat your army. Unfortunately we went our own way and we can not manage to become a modern nation with a developed civil institutions.

09/05/2005

A grand celebration to mark the 60th anniversary of the Victory I perceived primarily as a celebration of self-preservation of the USSR and Russian people's biggest losses, but the real victory in that war, as history has shown have won peoples who fought for the ideals of liberal democracy by the Western coalition countries. Column generation of winners. provezonov on Red Square. aroused in me the idea of Russian monstrous errors

the people in the twentieth century, the monstrous crimes of its elite created by the leaders of the proletariat from the lower social strata, people forcibly snatched from the plow and the machine. [Winners must be ride on the Volga-Muscovites own, led by children and grandchildren.](#)

And as proof of lessons learned last present regime led by President could for the day Russia June 12 to arrange a modest celebration with the past of the column of open Mercedes with millionaires and billionaires in Tver with the departure of the Red Square to greet the veterans of the Great Vi And if the people gathered, and veterans will welcome them, or at least tolerate them will be taken, then our cause is just - we won.

30.06.2005

This spring and early summer I have lost friends and colleagues: suddenly died [V.Slipchenko](#) and V.Vasin. Take, Lord, their souls.

Go giants, who lived and worked in spite of difficulties. Coming generation, which has yet to learn to live in the conditions created for them of lib

In memory of his friends decided to publish [excerpts from the self-published book L.Kulikova](#) - nice person to me, which I presented V.Vasin and communication with whom I broke off in 2000. After the forum, the Social Democrats. Books that I have not met in the store. I hope it was published 28.07.05

Holidays in July brought me a vivid picture of life created by God the Father in the world:

- to remove bred Goupille I ran into the tank company from the local lake. Rotan male ate and other smaller fish, and large adult females emission from the tank to the floor;

- passed by a tree in the morning, I heard and then saw on the footpath nestling begging voice and flapping wings that he had to take off a tree and survive;

- examples of the desire of the living to survive among the plants and do not count, but the humanity, his intellect still have a long way of development the formation of intelligent life.

London bombings - a manifestation of intelligence, another call to remove the "Rotanov" of a society in which there is despair, threats to the survival a great intellectual weight. Perhaps whales beaching themselves in despair when the water meet the huge submarine.

Here is the key definition, inspired by [the philosophy of nonviolent development I.Ostretsova](#) :

Life - a form of existence of intelligence, the Holy Spirit carrier.

Intelligence - the ability of life to develop through trial and error, the accumulation and consolidation of rational behavior axioms in the space-time world.

Reason - it is a manifestation of the rational intelligence of mankind, flora and fauna - the harmony of life on Earth; out of mind any form of mortal life.

An interesting method of measuring human intelligence and improve the rational organization of society A.Kazmin suggested in his book ["The Theory of intelligence. How to choose a president?"](#).

[01.09.2005](#) held elections Vlasikha in Odintsovo

[18.10.2005](#) died ANYakovlev. Died statesman, feel free to use force for social control, which is a pity. This is precisely what was lacking to them Gorbachev. Putin corrects their mistakes. But I would not have gone too far in the relationship with our people.

1.12.2005 The people of Germany for the first time a woman has chosen his chancellor - an indicator of the proper course of the nation after the Great War. Our male politicians to work much more to recommend people a woman to the post of the President and the Supreme Commander.

07/04/2006

In St. Petersburg, killed black students from Africa and found near the gun with a swastika.

At this time, reading the last book of AA Zinoviev tragedy of Russia, could not resist the replica.

I went online forum and other places to set out his philosophy and the definition of philosophy as "verbiage about the inability to solve trivial problem An individual manages to make a few specific things, and philosophy, and even less. Zinov'ev is not an exception, since in his works philosophical verbiage often failed to lead to solutions banal problems.

I'm not a philosopher and I can only summarize their views on features of our age, man and society.

Today, as a result of the technological revolution of the late twentieth century, mankind once again reinvents itself and in this context, outlines the contours of globalization - a new society of the Earth as a platform for the Age of Reason, where the basis of life would be the individual mind a person and not private capital, fences, religion and other national boundaries and limitations.

Globalization - the name of social traetorii humanity and its main driving force in this historical period was the United States.

MIND Epoch allow their potential to all the people of the Earth, and it is very possible they will live not only in the United States.

Even in the case of a hypothetical samorzvala US picked up the baton self-organized global centers of power with the same vector with the same program. Intuitively, this says Zinoviev in his works. USSR essentially walked towards globalization of the world, but its inefficient Soviet way of which he, the boy from the village, who became a professor, regrets. And I understand it very well, since itself the successor of his father - an enthusiast of village, the student soldiers professors. But the fact that the initiative of the United States intercepted whether to be sorry, can help leaders? An alternative would be a confrontation, practices and results that many of us still remember and observe today. Of course, globalization is not to introduce a decree is necessary to go slowly. Certain features were observed humanity thousands of years ago, but society still far from honesty in a relationship. The nation constantly generated millions of years rooted aggression.

Our President's strong position, the Government and the Duma on the side Vosmorki and the United States including could help our young people to their forces to the vector of globalization and the accumulation of the individual mind. Visitor fluctuations of our leaders in this difficult transition period for Russia are not conducive to the transmission of cultural traditions to young people of humanity, which own mind, and given the nature of the forum trying to solve the problems of the world order.

21.06.2006

After decades, the search for truth in the social movements of the individual and society, reflection and intuitive active participation in setting up finally can check their steps on the books of management; for me it was an event. I recommend:

1. Khalipov VF *Kratologiya - the science of government*. Concept. M.: Economy 2002.

2. Marshev VI *History of Management Thought: a textbook*, M.: Infra-M, 2005.

3. GV *Atamanchuk Management: the nature, value, efficiency: A manual for schools*. - M.: Academic Project; Culture 2006.

Excerpt from [2] "Should we somehow answer the question of why our country and in the post-reform period of the XIX century., And in the period of socialist construction in the XX century. And (yet!) In the period of democratic change (the beginning of the XXI century.) is controlled, compared other countries, much inert, weak and ineffective if the Bolsheviks criticized the imperial regime for limiting the backlog of advanced countries, which they themselves brought the country to destruction.; if Democrats liberals in rejecting socialism themselves can never make the country dynamic development and podoy ty to solve its problems, which means that for this there are some factors that need to look for. Where are they? In the minds of our people? The skills and its traditional activities? In the ideology and values of government entities and their management on their part? Or even is something? Just study ypravleniya by weight control influences the set of government entities or governing wills, moreover, in cooperation with the consciousness and activity of the people paving the way movement along the path of scientific knowledge."

8.12.2006

November 2, 2006 in the [Community Center Sakharov](#) I attended the presentation of the book [Egora Gaydara "Death of an Empire. Lessons for Modern Russia."](#) and that was for me the main political event of the year. I did not hear performances Gaidar more than 15 years. Now he appeared

and wise leaders at the right time. I want to say thank you present Egoru Timurovichu, and wish him every success for the good of Russia. And the fact that he was in his youth a lot of confidence, so this ... more dignity than sin. Who is wise in his youth?

And that abomination of what is happening in connection with the murders of the leaders of the people, so it effects the failure of the democratic movement to enter into a constructive direction, arbitrary internal squabbles since the Democrats have failed to be firm and consistent since 1991. In Russia not one of General Napoleon. That's the lesson in democracy: freedom of freedom, and the party to reform the administration of the country, create a democracy in 1991. It would come in handy, and the power of the laws adopted and implemented at this time would cause awe and respect for everyone in need of a firm hand of the individual. But alas ... In the current party of power rushing bureaucracy and random people, but a social movement is not quite in the right direction for their spontaneous development. Law enforcement agencies are weak and disorganized. Repeat the sad experience of party building the Communist Party - grayness take all niche and will again slow down the development of the quality of life in Russia: the extremists to undermine the vitality of the people. ... Don Rumata of "Hard to Be God" once made a momentous observation: when mediocrity rises sooner or later it is replaced by black. Still slow steady development of the political system better mobilization option of leaving epochs of intense development.

12.12.2006

Today is the Day of the Constitution of Russia and I want only one thing, that on all the front pages of the media and channels there was an announcement of a fifth national program called the National Guard. Enough of all weapons of poor talent people called the police. It is time when you attest to skomplektovat professionals of the National Guard from the police, internal troops, riot police and all emergency and other forces. That is an extremist only when a National Guard fell in awe, and a good citizen felt confident.

20.03.2007

11.03.2007 regional elections were held. So much dullness and dirt that now only national guardsmen and can be entrusted with the electoral process. Commander of the National Guard - Chief Electoral Officer to the development of democracy in Russia. Let this order continue for 100 years or more. People should grow to a civil way of public life. Trust the people (citizens under the constitution), the court and the election is still too early. Along with temples (now being built on level ground in Odintsovo church in honor of St. George the Victorious), it would be necessary to create jobs and build public and political centers, citizen parks, not to suffer people today, where people would be able to direct their attention to himself and his neighbor. [discuss their problems and feel their people](#) and, perhaps, the whole of humanity. Such an initiative could be developed in conjunction with the existing centers, such as [the Museum and Public Center. Andreyva Saharova](#). In the meantime, the idea of developing enthusiasts, like the hero [V.Cherepkov](#) [Vladivostok](#).

Drafts of these centers must be created with a small park, where there are constantly reading rooms, halls and rooms of oratory and other parliament parties and social organizations, trade unions. And only a few decades, these centers will present their projects to the value-based management for the sustainable development of society, national elite and nuggets of the people, which [the state guarantees equal rights and freedoms](#) of man and citizen regardless of gender, race, nationality, language, origin, property and official status, place of residence, attitude to religion, convictions, membership public associations or other circumstances will vote for their projects and programs realization directly by modern means of individual registration opinion, not through representatives in Parliament or outside faces of the current leaders carefully decorated parties. And while religious temples are being built, which does not prevent bloodshed or Chechnya, or Iraq, and maybe that's temples with uneducated fanatics of faith will become centers inter-confessional conflict in the future of Russia. If we are in ancient Iraq cut each other brethren of various denominations, Muslims, Islam, the artificially enhanced by various religious Russian direction through their fanatical adherents will bring the nascent civil society in Russia more harm fanatical Bolsheviks.

Religion, Orthodox Church, will not be able to unite the people, to generate it in modern culture. The modern age can only be based on human dignity taking into account all the values konkretnogo community, civil initiative of the masses and direct ownership of socially-useful objects, ranging from common dwelling houses. [The era of the anointed of God has passed](#) and her return is fraught with a lot of blood. We need effective and different "combiners" of the people, social networks, communications, and yet is united people only smoke fatherland, smelly entrances and half-empty library churches, sports facilities. Even the great Russian language in the media and only works on incitement of hatred in the vast Russian plains. Mostly parents, civil society combiner can act only democracy from below, supported by all branches of the control ([power](#)), and if the company does not develop, does not unite, it is a direct signal to the re-election of the ruling party or the reform of the state apparatus of any structures.

29.04.2007

In Moscow Mstislav Rostropovich was buried cellist.

Hold the maestro on his last journey to the Novodevichy cemetery came dozens of well-known people. Among them, Naina Yeltsin, Yuri Luzhkov, Ilham Aliyev, Queen Sofia of Spain, the French leader's wife Bernadette Chirac, and other prominent representatives of progressive mankind.

on 28 April and I had the honor last bow to the great citizen of Russia.

Yes, it was not an endless stream of grateful citizens. There was not a lot of grateful contemporaries. An endless stream of people 70 - 90th, to which was on the orders of their commanders consisted of persons of a different quality.

The funeral of [Boris Yeltsin](#), and M.Rastropovicha K.Lavrova in the last days of April reflected the beginning of recovery of the society, the people of Russia, who began his path to citizenship in a democratic country.

Russia has a constitution but no civilians. There is great music, but there is no audience. There are talents, but they do not have fans. There are No Prize winners, but there is no grateful compatriots ... Had Russia is doomed to eternal mediocrity, talks about the weather, the population?

It is time to stop the mobilization development, enter into an alliance with Europe and to draw from the culture in exchange for their raw materials gradually increasing the quality of civic life in Russia. As do, for example, the Turks: Someone Ahmed from Turkish village came to work in the Moscow market, he married a Muscovite, who bore him six children in a row and after that he has taken away the family in his native village in Turl. However, she then "come round" and divorced him. But what a hero Ahmed - our own tough guys in Razvalka only with a bottle of beer can walk down the street. [And to go to Istanbul and from there to bring his wife and six children - is still poorly](#).

Anyone who has been in a Turkish village, confirms: the comparison is not in our favor.

6.11.2007

Yesterday on TV channel Russia walked film "Winter Storm Denial.", Director Galina Ogurnaya production: 2007.

The film is dedicated to the 90th anniversary of the October Revolution. The filmmakers present their version of one of the key events of the twentieth century, based on newly discovered facts and documents and studies of authoritative experts. [Who was the real organizer and leader of the October Revolution?](#) What was the secret role of Kerensky before and during the revolution? What were the military forces of the Bolsheviks, as well as who the militants were preparing a "revolution" in reality? And what was its true purpose? All these questions are answered in the film, tipping is still well known myths about October 1917.

Of course, the absolute monarchy hinder social development in Russia, but the February revolution (even if initiated by the intelligence services of countries opposed to the war) could not lead to a constitutional monarchy or a republic, the people were not ready. There was a collapse of the state, the days M.Gordachova restructuring. Apparently, Lenin desperately seeking the interest of the people by the political struggle by small forces and the defeat of the tsarist slogan in the period from 14 to 17 year was the justification of his deal with the enemies of Russia. This led to the betrayal. A country led to [the civil war](#). After the war, in the struggle for uncontested governance conspirators use force and destroy the weakened Leninist group. [Stalin](#) who may not be used by sponsors. led by the updated power vertical relying on force. thereby compensating for the lack of money and expertise in a

functioning of the parties; because of pressure chain of command does not develop a system of social relations and civic culture, and personal [moral ethical image of an average Russian](#) needs in many of the properties and the quality is far from the average Western European.

After watching this film I have one desire - to demand the trial over the February-October 1917 military coup. It is time to re-create an authentic past and try to objectively evaluate those and subsequent events. After all the revelations of recent years has been nasty to walk on the streets of revolutive terrorists and mercenaries of external intelligence, to look at [the conspirators monuments](#), blaming each other in enmity to the people and knowing involvement in his and his associates to foreign intelligence services, organized mass repression in the name of a great purpose (known Had these dropout, what needs to now I have reasonable limit), reinforced savagery performers that awakened and another tradition - to the neglect of the people of the country as during the time of Gogol, still live on the dead souls. Frostbite Russian population still fooling, lie and threaten. Only controlled from outside the public administration may prevent the rampant criminality in the country and economic crimes. Bankrupt at the beginning of the way [Marxists-Leninists-Stalinists](#) in three waves of its global revolutionary plans traumatized Russia: 1- adventure with the world revolution and civil war preparing for the conquest of Europe and World War II; 3-arms race and the loss of the "Cold War".

If we want to live a full life and develop it's time to turn to the cultural and historical roots of Russia and create [real world](#), society, citizens' initiative to ban all mysteries and secret organizations (to go beyond the slogan of 1917.: "The publication of the secret treaties"), jokes and slander, gently join [Credited society should be revived in the real world, not to lie, and learn to live each freely and not be afraid above all of the state apparatus.](#)

I see only one way - globalization, in alliance with the US and Europe: Russia can manage so far only the bureaucracy with the avant-garde as the in power (primitive version), but it requires [a set of laws-limiters for the crowd and the adherents of the new order](#), which are present in our weak and sick society. [President of the ruling party forms the group that seized control of the state \(the power\)](#). Consequently, all efforts for the next 50 years should be directed to the observance of the turnover of the Russian President on the constitution and training of elites to the election of the President the World. Political parties are likely to wither away over the years. Niche transition to civilization is best to give the two parties: United Russia and Russia - even compete for the benefit of the people, replacing each other on the political stage, without involving the people in a tough political fight (yes, it is - a primitive version). The reality is that not only the head office, but not any movers foreman open to members of his team: snitches all verticals influence different operas and one department cover the country with a solid network. Particularly dense network in Moscow, in the scientific and military bases under the Central Government: informer always happy to communicate, but rarely express their opinion by a public without order from above: in my opinion a typical image of the informer. These secret goslyudi of the political department of the KGB, [counterintelligence](#), criminal gangs guarded, conserved mode, thereby reducing the political culture of the population, and today it remains primitive and lack of democracy; be prolonged unfreezing of public initiative, building democratic societies, cultivating trust and openness of the whole society.

It is possible that the PCA, Apple and other parties should unite with the Unified and Fair Russia. Earlier I suggested that democracy in Russia and will approach the 2008 elections prepared, but unfortunately made a mistake. Nikita Belykh must fight for the freedom of another 10 years, and only him and believe he can really put to the people to choose the PCA.

Leader shows wind election time in jail or plow in the political field, but not declared to the people before the elections, after working in a bank and rallies urge to sing Ale-Ale ...- disgusting. Neither democracy nor the Democratic Party has not yet formed.

Give voice to Putin and his team - let them try to implement their plans. SPS and Yabloko must also join Putin's plans and did not participate in the elections. This will be a strong move, designed to consolidate the nation. Enough of the confrontation, the opposition in Russia should only be constructive. If Putin's plans can not be realized, that's when the United Democrats with the leaders working for years in 2012, must win, and mature people can support them and again try his hand for a democratic construction! If Putin's team to be successful, it will be the basis for Russia's political culture. If not, and the tyranny of our population is useful Kholuy spirit of Russia has not erode long. And the young leaders casehardened. In short, losing by Putin's leadership is impossible. And he does not extinguish mass rallies in his support, as did Yeltsin and its surrounding so-called democracy which temporarily put on sofas.

Before using the schemes of democracy to our people, we must first create material and spiritual foundation of the nation, gradually learning to self-organization and direct expression through social movements, trade unions, clubs, clubs, workshops ... may depend on speed of this process on many factors. But do not rush (complex version of a society of social change management in the process of solving creative problems should ripen). The twentieth century was the century of the gray people, often looks beautiful, and charismatic leaders, often bowlegged and pockmarked prescribed in criminal law favors for crimes committed in the affective state. I hope that the new century will be the century of open elite, the social hierarchy on the basis of reason and social solidarity of rich people, condemning the violators of law on thin technologies without any privileges.

26.11.2007

Kasparov's arrest for 5 days - the beginning of a given epoch in Russia. If the arrest did not mark the beginning of the tradition of the rule of law, it be the beginning of the era of lawlessness. We will see...

12.12.2007

a total of more than 75% of the vote, was offered to nominate Medvedev as a presidential candidate, "United Russia", "Fair Russia", the Agrarian of Russia and the "Civil Force", scored in the parliamentary elections on December 2 - On Monday, four parties. God has not forgotten Russian and us one last chance!

In my opinion, Medvedev best candidate for the presidency. The strength of Russia will grow investments in human; bondage must disappear from expanses of Russia. And the first step - hired a professional army, the second - the protected work, and the third - the openness of society and person property. As a rule of law would be good to introduce penalties for failure to appear for the elections, I think our people and citizens of the accounting system ripe for this.

23.09.08

In August, during a holiday in Gus-Crystal Event enforcement Georgia world perceived me ambiguous. Today, it seems to me that the deposits set around the city of my childhood and adolescence are not converted into semiconductors due to such events. If my fellow countrymen, will continue the traditional bottle and faceted glasses for alcoholic from Ossetia and other regions of Georgia, sending their sons to guard battalions, the local peace enforcement, and investing in the local security today make it impossible innovative products tomorrow. And this, in my opinion, is much more dangerous for nonchernozem central Russia!

Russian people need sustainable development with elements of the liberal wing of the West (Russia still possible for these liberal development methods, as have the resources), and we do not need to go back behind the iron curtain on the basis of the local forces, converted into the country or nearest neighbors.

In my opinion, the world is becoming globalized in three axes: on the power axis (took two world wars and now the leader of NATO and had led Warsaw Pact are the vectors of peoples to integration would be the same), for money-axis (the world financial crisis since the 20s is not uncommon now leading US banks, if the lead Sberbank, the differences would be too small), on knowledge-axis (a vivid example of the Internet, which while leading the US, but Russia could lead and the difference would not be significant). If so, we do not oppose the objective slip along these axes, NATO would be able to promote order in Georgia, and science and extended contacts with the West have already helped over 5 years to turn Meschera in U analogue of the Silicon Valley. However, the reality is that we value the same but different implementations. Social development, while Russia falls behind. Within the country there is a serious brake and he, in my opinion in the social management, leadership system, leadership relations, in relation between people, as the people themselves. To nascent society cadaver masses last was adequate to modern challenges and to form its structure, include the middle class. we need several five-year plans the quality of goods is not. but a man: even out or zoom in human and social capital of the Russian

25.10.08

He passed away Muslim Magomayev, leaving the happy moments of the past life. The Army in 70th Magomayev, a record with a song in his performance "Wedding" played on Sundays all companies and this song, I'm sure, to maintain discipline and order is better than ten thousand ensign and often compensate for their absence-presence in the barracks.

25.12.08

The most important result in 2008 - is the completion of my son on his thesis on leadership for sustainable development, management of values [on the dignity of every person](#). Of course, the protection of scientific work has been postponed indefinitely, but the graphic results of his research with his permission, I have the honor to submit to the judgment of my readers. Important in happiness - is the reliance on human dignity and development good-natured chat, relationships (social capital) of values, the same commemorate all. We should not forget his dignity - that's 10% of happiness! (N 1993, I ran for the State Duma, and in my program were these 10 values, but values in 2008 turned into a system based on the merits and later, in 20 the image was corrected. The advantage of 100% correct to consider in the calculation of happiness).

Of course there is a local fortune: at work, in love, in the house, the money ... but it is better to have a genuine, value-oriented. The future of leadership on the basis of human dignity.

Счастье

– это произведение достоинства личности ($D_0=10\%$) на среднее значение ценностных ориентиров согласно Конституции России:

$$\text{Счастье} \approx D_0 \times \frac{3 + P + L + C + O + D_1 + D_2 + C_1 + B + \Xi}{100}$$

© 2009 И.Майоров, gung@yandex.ru

21.02.09

Vertical control Russia (79 words about the power of the Constitution) without a horizontal component (of 2 words of the dignity of man and citizen in the Constitution) has proved to be ineffective in investigating the case Anny Politkovskoy and Paul Klebnikov and earlier. All this confirms the need to continue the organization of social control systems on the basis of modernization or democratization enlightened man management based on the dignity of every citizen and [renewed leadership Istemi](#).

The current public safety is weaker than the permissible level for a democratic country an obvious, democratization requires openness, distributed and mobility, but there is no reliable protection of the property, there is no affordable housing, is not working financial system; environmental problems caused by free men, ruining the health of generations; closeness of administration from the people who could know and respond to the situation, aggravate corruption.

The onset of the global crisis calls to the most serious relationship to social science and systems of global leadership, it is necessary to immediately make changes to the "standard" social capital of the individual in relation educated and dynamic people: otherwise, in our conditions, people can open a war of all against all. For sustainable development it is necessary this time to adjust the top leadership system in Russia.

12.03.09

Social movement of matter (subjects and organized human communities) reached a global level. Now is the time to optimize. I am afraid that no one will stop mankind from sliding into a third world war - the first global war in which humanity refuses to goal-oriented outlook and move to the value-oriented behavior under the protection of the global rapid reaction force. Perhaps, at the legislative level, the international community will check the development of each region. Otherwise, sustainable development will not work.

But the most important thing is that no one will make an analysis of the causes and

consequences of the current development of society - in the living can not stay dates thinkers, which now is not enough.

18.03.09

Colonel Victor Barvenkovsky in the newspaper [Vremya Novosti N ° 44 dated March 18, 2009](#) once again drew attention to the actions of "loyal Party of former officers of the General Staff" - the current Strategic Missile Forces veterans. On Vlasikha political department officers took away the characteristic of [the "party of the case committed"](#) in the personal, sometimes there were the words "boundlessly loyal." These are the pages of the history of party building in the army, in a single garrison. History of accelerated development due to external threats and deceleration of the space industry, artificial, ideological confrontation with the United States a poor country with dedicated "business" of communism officers. If in the characterization decent officer instead of "Party cause betrayed" put down more objective records, such as a decent citizen, functional, tough, athlete, rich, a good far man or hereditary military loves native history, wildlife and nature, literature and music comprehensively educated, ethically correct, innovator, inventor ... such an amount could grow to the desired quality of the people. A dedication to the cause of the party crumbled to dust. It will happen in North Korea. Sometimes I ask the veterans if you appreciate the world, whether you appreciate the phrase "to the Party betrayed," they say, which more expensive. But by how much? They reply that 500 \$ is also on the road do not roll, and by order of Leonid Brezhnev could burn the whole world capitalism and violence. [And for many ordinary values are not clear, or equivalent party, corporate.](#)

By analogy and our Russian lads in different areas of greater Russia "devoted to the cause of the gang", but by how much? Surely, most fraternities know no more than 500 \$. And only a few in all of its corporate values provide its members with a tolerable existence. However, the examples do not know, and yet non-formalized values for unambiguous interpretation and measurements, and we adopted the Constitution, but does not read on their or collectively, [either through the media](#).

29.04.09

For Russia, the federal law on monuments, the names of streets, squares ... it would be necessary to provide that individuals can be perpetuated on hundred years, only in local laws in 50 years.! Otherwise, in the affairs of the Russian associates, associates and the lads did not understand, and the 1000, and the citizens will wander through the squares and avenues of thugs.

In my opinion the best one proved to be a monument to composer Aram Khachaturian opened in 2006 in the center of Moscow - in the square near House of Composers in Bryusov Lane with the First Lady of Russia Lyudmila Putina, Armenian President Robert Kocharian and Mayor Yuri Luzhkov

The [bronze monument](#) by sculptor Georgy Frangulyan and architect Igor Voskresensky sealed by the maestro in moments of creative inspiration in musical instruments surrounded almost at ground level.

Aram Khachaturian has created a world-famous ballet "Spartacus", "Gayane", symphonies, instrumental concertos, music for films "Masquerade", "Admiral Ushakov", "Othello". It is known in the world and his compositions for theatrical productions.

But the most important success is the memory of the people, the local children love to play around with their palms and two feet, the polished monument.

06.07.09

Another chance for the people - whether it would not be able to miss the legally elected [President?](#)

12.08.09

[Vacation Gus-Khrustalny](#)

23/08/09

I think that now transparent and [reliance on human values is most conducive to the development of Russia](#) . If people are disoriented and silent the may be spontaneous or planned the coup to eliminate social or technological collapse.

1.10.09

Noticed that old. They began to annoy the young advisers country's top leadership, broadcast on TV. For example, they say that the 13th year we v establish, deepen, extend and proizvedom. But why even 3 years ago is not established, it is not deepened, not expanded and not made - are silent.

As an outcome of the work of the teacher updated his [book about the computer user](#) , some praise.

13.12.09

I am listening to the radio Ekho Moskv transmission Eugenia Albats involving Elena Masuk. What brave woman! It is a pity that such individual not enough. And they need a lot for Russia, very much. Although there are sprouts.

However, the case with ordenonosnogo military colonel form with nadraennoy fittings, place your photo on the site, and dared to ask questions ab Footcloths former civilian ministers with red hair and not the Minister of War its pores of the death of comrades in Grozny, it is difficult to qualify. [I heroism?](#) Asking questions ought to be better each start with ourselves, practicing civil consciousness!

20.12.09

Watched on TV transmission [Stalin](#) us - struck me ordenonosnogo Colonel threatening liberal media, the society sprouts some future punishments the name of the fatherland without society under the control of the newly established administration, merging into a single glass of the church father the fathers of the godless vanguard of the working people. Abomination that threat from the military in our time in Russia is evident. Warriors of our young democratic republic must protect the rights and freedom, including the freedom of citizens thinking in any legal direction in accordance with Constitution. It is very important to find a way out of difficult situations of human development in the twenty-first century.

Yes, even some figures on the transfer of small clear feats ginger Georgian - [Stalin](#) , shamelessly humiliated all, and most importantly, those who remember his misdeeds, insulted the memory of millions of victims of his orders, they humiliated and my self-consciousness of the citizen. Police to these hooligans and provocateurs does not get, and society as a person learn more in the discussions and scientific findings to assess the social movements and actions of selected leaders, learn to admit mistakes and glorify the victory of the people.

It is necessary to make broader use public debate to improve the culture of the emerging society, strengthening the solidarity of our people. Invitin such transmission, it is necessary to prevent and participants and spectators that all the above will be appreciated by society and law enforcement agencies. And one might think that the speech on television outside the legal field.

In those days he was buried Gaidar, who undertook to save Russia in 1991. The Duma refused him the rank of "father of the regime" and did not v to stand up and honor his memory by standing. After such an act would be good to create the commission and to assess its activities to date. And it i clear: silence can only vote ass of himself, and the deputies - they are representatives. Who and what are they sit in the Duma ?????????????? Do not the eggs of the same?

Problems of sustainable development and global partnership

Thinking watching television 13-16 January 2010

watched footage disaster in Haiti, the death of the UN Office on the island ... and somewhere to go hope for a peaceful way to replace the intensive development of a stable, and after watching Dmitry Medvedev meets with leaders parties on the political system to think about general social development in Haiti and Russia, about the ongoing weakness of the progressive mankind throughout the ages.

Two hundred years of free Haiti and almost a hundred years from the king of free Russia could not build an acceptable life for the fatherland. Both countries are in the lead in social experiments, both widely used military force, but one interferes with the heat, others, perhaps - cold. But I think - administration, substituting for the natural and historical social relations of the population.

http://www.un.org/russian/ecosoc/adhocmech/cronology_haiti.shtml

«November 25, 1998

, the Security Council in its resolution 1212 (1998) of 25 November 1998 extending the mandate of the United Nations Civilian Police Mission in H MIPONUH), reaffirmed the indispensable role of international assistance in promoting sustainable development in Haiti and offered to bodies and agencies of the United Nations system, particularly the Economic and Social Council, to assist in the development of long-term program of support : Haiti. "

something no reports that The UN Security Council and other UN bodies are transformed into a World Government with a global response forces to support sustainable development or other concrete steps towards a sustainable development system.

For example, immediately after the disaster in Haiti can be Force global governance, with financial support of the World Bank and the scientific recommendations of UNESCO and other world science cents to develop a program of sustainable development of the Earth Island.

It's a shame, but the Millennium Development Goals is likely not to be achieved by 2015:

1. Eradicate poverty and hunger
2. Achieve universal primary education
3. Promote gender equality and empower women
4. Reduce child mortality
5. Improve maternal health
6. combat HIV / AIDS, malaria and other diseases
7. ensure environmental sustainability.
8. Develop a global partnership for development.

Statistics of Russia in 2008

Birthday - 1713947

Died - 2075954

Marriage - 1179007

Divorce - 703,412

The population of the district as of 01.01.2008 - 45.5 thousand hours.

Population of the city:

1926 - 17.9 thousand.	1982 - 73 ths.
1939 - 40 ths.	In 1986 - 75 thousand.
In 1959 - 54.2 thousand.	1989 - 76.3 thousand.
1962 - 59 ths.	1992 - 76.9 thousand.
In 1967 - 63 thousand	1996 - 75 9 thousand

1973 - 67 thousand. 2000 - 73.4 thousand.
 1976 g - 69 ths. 2008 g - 61.9 thousand
 in 1979 - 71.6 thousand. 2009 - 61 thousand.

[Statistics on the city and region Gus-Crystal](#) in 2009

City of Goose-crystal	Neighborhood Goose-crystal
Birth - 752	Birth - 490
Death - 1278	Death - 1048
marriage - 684	marriage - 152
divorces - 289	divorces - 160
paternity - 139	paternity - 76
adoption (adoption) - 10	adoption (adoption) - 3
change of name - 24	change of name - 8

High mortality in the countryside! This means that the extensive development impossible. [What kind of modernization - it is necessary to stop the extinction](#) .

I believe that now is not enough to look after the work of the public initiative, an entertaining movie, concert, or the stars win at the Olympics.

The life of each should be of high quality, value-oriented, based on [the dignity](#) of man.

People need to take care of the regeneration of life of every citizen, and not about achieving Records individuals.

Record destruction in the twentieth century, millions of people in Russia during the arrangement of the inner life empowered by the "people" have a passive person who is unable to grasp the dignity, continuing indifference to look at the symbols of the brutal era - Lenin monuments, street names towns ... , coexisting with legacy command bureaucracy, "imprisoned" in the breaking of man. The population at the beginning of the 21st century are exploiting all the politicians of different levels to housing managers utilities. Apparently, we can expect stagnation to a new generation of politicians are able to sum up the twentieth century, Russia and most importantly to re-establish in people's self-esteem and [a firm's value social orientation](#) .

13.03.10

After 1967, once again completely scanned film Vertical. Many of his dignity negate and drink before going to the mountains, and smoking Luzhki route. S.Govoruhin and, for sure, smoking and drinking hudson ensure the development of young people smoking and drinking for decades. Then girl had not smoked in 1967, and drunk girls I did not see it. These films laid the present-day Russia.

02.04.10

In this Good Friday on TV channel "Culture" watched the film Andzheya Vaydy, "Katyn," Wajda treatment of participants and spectators a small discussion, a replica of the Russian elite after the film and could not sleep, leaving no post in this blog. The film once again confirmed the need for a rethinking of the twentieth century, or the bureaucracy and will be referred to as the mechanism, the means and the addition of a leader, which together make up [the basis of traditions of the current leadership of the system](#) with which it is time to part maturing humanity and Russia most of all - [it is chronically ill](#). In my opinion A. Wajda could strengthen the image of a company MECHANISM silent soldiers with shovels instead of a bulldozer. mechanism, which participates in the destruction of the future of Russia, without competition are accepted in institutions, he held command position laid the tradition of the present bureaucracy.

10.05.10

Has died down a salute in honor of 65 years ago, the completion of the Great Patriotic War. Yesterday 65 times was repeated Victory Parade in the terrible war-catastrophe.

And in a show of force in our country sets up the social orientation of many citizens, especially our young people.

The only lesson of this action is to believe that our soldiers should be taught to walk because walking NATO soldiers. Their step - a step the citizens love their country and are deeply conscious of their dignity, their values. Such men are very strong. Maybe [the girl in our Army](#) will serve as a catalyst for the dignity of the combatant soldier.

I write these lines, as already hurt my feet, that I was hitting a backhand on the parade ground for more than 20 years, the heart aches for Russia's future. Time to replace the empty step hammered tin soldier on drill training, based on human dignity, and then an appeal can be dealt with. Temporary slavery in the Army does not meet the country's needs.

I remember how insulted me, shouting commands, "Above the leg, pull socks !!!" Probably, someone came up with such a step for the soldiers, an even mandatory drill to teach this step. Perhaps, in order to arrive at the Army man he felt no ground under his feet, a man without dignity, as even to walk is a two-legged creature is that the entire service is less reflected marching. And I thought, looking at the dignity of walking guests of our 65th parade, army reform should start in the first place with the reorganization of the drill, which is all its combatant techniques should emphasize the pride of a soldier of his human dignity.

And coming down, many veterans will be able to keep at least a strong legs.

03.08.10

Analysis of current events in summer 2010 showed - our people, and after the 65th anniversary of the Victory in the Great Patriotic War are not yet masters of their own land, the citizens of a free and democratic social republic. The administration of the current ruling party in the transition to democracy could not develop an appropriate strategy. Population freed from mobilization style totalitarian regime continues to be indifferent to what is happening around. Judging by the picture of the fires and hearths is characteristic of the Ukraine, and Moldova. The ruling party and there and we are responsible, but the people and asks them, because they do not create their people. Hence the way people from a totalitarian state to a democratic self government will be long.

The power of the state was asleep, but people have to replace it does not appear of their own strength, property, cash and developed means of payment own ethical rules of everyday communication. Weakened regime in Russia could not updated [vertical](#) control administration compensate its former strength, did not become public and richer, and wiser. Administration, announcing an emergency or an institution of the criminal case anyone does not frighten. These signals for even the poor and the organized civil society in the public indifferent, and even officials ignored tier below.

In addition, there are constant interference of self-organization of the people in some regions. For example, in the town of Khimki something does not happen the consensus between the administration and the people on the local deforestation. [E.Panfilova resigned: assistance to the people in the organizations of civil society - is not an organization of children or adults at dances](#). Abandoned to their fate civil burned in hot weather on the human factor a great Russia; burn and recently separated themselves from the people of Russia in Ukraine and Moldova - we still have [the overall proportion](#) But against the background of fires occur scandalous dances for young people at Lake Seliger, supported by the President and the Prime Minister. An action looks at least not to the point; especially since every year fail the necessary fees to the state of youth in the Army. Strange, but until the Army happy only women and that of the province.

And if and extinguish fires here and there, the only method of mobilization. For example in my city youth, [Gus-Crystal in the summer of 2010](#) , as in summer 1972, the new local administration imposed by the city as the head is not a local man (God grant him health and success), not remembering anything and nowhere to cook promotes extinguishing fires in the area nearly the same forces - the soldiers of the call and shovels, which is not enough. Such large fires in drought arise only because there is no tradition of local government: no strong entrepreneurs, and officials take their places in the mostly for their own enrichment, and there could not care less. But the houses are lit as well as the neighboring huts. Fire does not recognize

administrative boundaries. The air over the city and the area is one, bedbugs and fleas crawl out of the apartment homeless in an apartment with renovated.

It would not be late with the development of civil society. After all, well-being alone does not solve the problem of all.

Only the inclusion of rigid legality, commitment, initiative and fairness in every action possible to avoid similar and more serious disaster.

At the same time our population is still not ready, not only to democracy, but also to the packaging of products that people are scattered everywhere. Advertise women's cigarettes and beer led to the fact that girls and young mothers, as they think, effectively drawn out and graciously throw cigarette butts everywhere, even in the grass at the kindergarten or a wooden house in the village.

17.10.10

The resignation of the mayor of Moscow and the appointment of the new mayor outlined for me the next milestone of my story.

So, from October 1994 to October 2010 it was 16 years of my selfless work in the City Hall on the same engineering positions with the main responsibilities of training staff skills using a computer apparatus. I hope that I and colleagues have managed to raise the performance of selfless work to 3%.

appointment of the new mayor fact after the election period, apparently opens the transitional period the birth of direct electronic postmodern democracy, which eventually will make redundant the political membership of citizens in the political parties of representative democracy. I hope the century will mature tool electronic citizenship Russian community: people will directly choose their various social projects and original social management model, including from abroad. (From the sometimes know better how we should live.) After a direct electronic selection - the approval of the electorate of the project for its implementation will be carried out again in direct e-election managers of the author's projects, which will be allow engage people from all corners of our planet. I foresee that in 15 years the post of Moscow mayor may run for Barack Obama, Kondoliza Rays, Arn Schwarzenegger, etc.

Of course, if the rates are low, and Russia's transition to a social model of sustainable development will fall, it will be their children or grandchild. I believe that the political parties, their moribund historical period in Russia for 30 years would be to legalize the political electorate Code games, the population of two or three parties, as a supplement to the law on political parties. In it provide that in case of dissolution of the obsolete or embezzle party creates a new ubyvshy in return.

Three games to one rule is not more than two terms, and the other would be in the system of the opposition, and the third to hold meetings is in the for, and fought for the role of systemic opposition and even the ruling party in the case of some ingenious solutions in the minds of party members. In case, based on the social networks necessary to train something to choose. In the meantime, our social locomotive with an efficiency of 3% is prepar to upgrade. Other social models for the management of modern hostel is not yet sounded, and most importantly the people are not interested. And it seems to me that the greatest effect in our historical time is possible by the construction of each person's own happiness based on the concept and self-esteem, family and home. Man in Russia should be on the basis of values for generations to learn to manage the construction above all his own life a skillfully, and critical of inefficient social institutions that use until 3% power, money and knowledge of the people. After 3-5 generations of values a person from a simplified vertical governance began to postmodern people will be able to find the need to select the specific models of social development management at all levels of society.

04.11.10

Today, I measured the activity of the community of Internet users.

Less than a month as an electronic people have lost interest in the still mayor. This fact confirmed my previous diagnosis - people tired. Yes and no confidence in the country to anyone. And if there is no actual sins, Prilep rumor anything, and even to such colorful figures like Luzhkov. Today it is possible to shoot anyone: people speechless - the new society has not grown and comprehend what is happening, most can not, and is not familiar to people such a procedure, as a public change of power.

25.12.10

My body is 60 years old. Thank God! I supported him as best he could.

Save God and my family, my colleagues, the population of Russia, familiar and unfamiliar people, the natural environment and wildlife around the world.

In its 20 years it seemed to me that I make mistakes in life, but no more than 20%. Accordingly, in the 30 - 30% 40 40% 50 - 50% and is now 60 years seems to me that the error was 60%. They say with age comes wisdom, sadness and sorrow: efficiency (efficiency) machines is not high. Probably, the effectiveness of human life, communities of people in an average of 3%. Lived 100 years people can be proud of only 3 years, beneficial moments which are covered with a heavy life. So that any man should not grieve about the futility and meaninglessness of life. Vigorous activity is not always useful, and if useful, it is not 100%.

On the day of his birth on December 17 received [one thousand rubles](#) from the trade union and by private invitation I went to listen to songs in the Columned Hall of [the House of Unions](#). By listening to our young artists, I felt something wild in the background of classical Russian romance. An House of Unions in our society, yet has little to do with the solidarity of our people. This concept is common objectives, interests, beliefs, mutual aid. Qualities that are lacking in our country's population to work in the innovation economy, for a comfortable life in their state.

The UN resolution on the day of the feast of Solidarity Institutions stated that such a concept of solidarity, should be the main concept in the 21st century. UN General Assembly gave instructions to all States to implement the media: newspapers, TV, radio, more programs on the theme of solidarity of people in relation to each other.

By December 25, I ended my [two-week social Marathon](#) on registration of pensions and social inclusion in the register of personal data. It seems that there is no one care about me, and my credentials are scattered which was vouchsafed me to manifest. It would seem that I do not collect them yours then our dear state apparatus they never collect. Burn and go into obscurity people like gone nowhere in the room for my lonely grave mound house!

08.08.11

[20 years old network the WWW](#), which gave us the West. Our government, however, mastered the money to Russia and the Electronic Single Wi to have forgotten about the e-Citizen. And now, these projects simply can not dock any real leadership, no real population, for some reason not taken account in these projects. Although [money was allocated large](#)! The past decade remembered me only permanently warped by the mayor's office IT project managers looking for new budget appropriations updated their costumes, new flavors of perfume and obese baskets with gifts for managers of state-owned assets. I have never failed to meet in the corridors of City Hall engineers or enthusiasts from science. Only once I saw tears girls are not a contest for the vacant godolzhnosti first once. Computerization of the last 20 years has not changed the principles of traction control machines, or a kind of comfort in the document. How to switch from coal to oil in locomotives: fireman became steam engine operator efficiency went up by 1-3% and the passengers of this and did not notice. Apparently, our difficulties to be found in our history, in its depths, and create filters for the activity of idiots in management positions.

19.08.11

Days 19-21 August 1991, I remember the greatest uncertainty in which I was, our population and perhaps leadership of the USSR Mikhail Gorbachev and the team started a restructuring in the USSR.

According to their mentality and, apparently, on the recommendation [of his wife](#) - Mikhail Gorbachev dropped reins of state administration. And perhaps it was done according to the plan "To take out a horse!" With a restriction on the bloodshed in Moscow.

On the morning of August 19th Chief of the Strategic Missiles Forces and called a meeting of all staff officers ordered them to remain calm and not to interfere in civil events in Moscow. But when the reins were released, the state administration of the USSR horse suddenly stood up, and social storm increased sharply. For example, there have been suggestions from the "faithful to the Party comrades" promptly issue extrajudicial trials and [lists unreliable](#) from the ranks of his comrades: [isolate Democrats](#).

Probably, events began to frighten the then councilors and especially the spouse Mikhail Gorbachev. She got confused and her indecision shone in actions of the Supreme Commander.

On August 21 the most decisive steps were Boris Yeltsin's change of its supporters around the White House. He took the reins of the state administration and fall of the USSR. At the same time democratization has proceeded with the acceleration and bustle of the restructuring is not diminished. In these troubled times, and I joined the democratic movement under the banner of G. Popov, An Sobchak, and other sober-minded contemporaries.

Then in the Soviet Union, and now the state machine, its device does not have time for the challenges of the time. It seems to me that the recognition and solution of problems of Russian civilization lies outside parties and will depend on the activity on the basis of the dignity of the person in all of us. The first steps in this direction give results: Medvedev and Vladimir Putin at the population became less likely to use the idiom: "dermokraty", "liberasty" etc. Interestingly, the most vociferous critics of the young democracy got us in the Odintsovo district of the land from dermokraticeskoy power, pushed aside many elbows. I have not received land for fruit and vegetable garden, and I publicly, but without ostentatiously participating for nearly 20 years in various democratic endeavors of our region and country.

19.10.11

In the city of Kaluga, the Publishing House Oblizdat GP, in 2011 published an interesting book K.B.Norkina "System problems of struggle against corruption in Russia." In his work, Professor K.B.Norkin gathered some useful thoughts on the right, the system bases of construction of the modern state, which is obliged to serve the citizens, not to meet the legitimate needs of the ruling class, based on the current understanding of the boundaries of the size of the welfare of the citizen population, personnel or entrusted to them collectively. He writes: "Of course, in Moscow, as well as throughout Russia, there are serious problems with corruption, but to blame it, for example, only the mayor is no more reason than to blame the higher Russian leadership in the extent of corruption in Russia. Rather, you can blame it on Peter I, who "opened a window to Europe", not entered in the Russian Magdeburg Law, or Catherine the Great, who, adopting excellent "Letters Patent cities" failed to introduce into it the civil society the tools and all the civil initiative it led to "assent" of the governor or other high-ranking officials. "Page 10 in essence K.B.Norkin warning regarding the dangers of not the corruption component, but also the negative aspects of servility in the legislation, rules and regulations dorms ashego population.

18.11.11

Circumstances have left me at home and I turned on the television, I looked at the news and switched to the channel Culture. There went the film "Kuvardin Life in the text." Director: Vahram Kevorkov. Production: 2006. So I met with Yuri Kuvardina. Read his essay, Fyodor Kryukov, risen from ashes, OR SHOLOHOVSCHINA, Communist mystification - <http://www.kuvaldin.ru/12.html> and I had the cheerful, resourceful, Mikhail Sholokhov which circumstances it is thus orientated, selecting from the dark disoriented masses of the population. You could say he was lucky during the social conflict in Russia, "in the crop sporlo breath" of the proposals of senior comrades.

In my opinion, in line with the modernization segodnyashney hopes for the initiative and the authorship of each, it would be necessary to investigate the situation with the authorship of Sholokhov, to evaluate this case and resourcefulness at the level of the Federal Assembly. However, the heads of people continue the tradition of promoting cheerful and resourceful, and Russia now need a mass movement of thoughtful and inventive authors.

15.12.11

Election 2011 with the mass falsification of expression, manipulation with summarizing and almost live over the Internet, once again assured me of the impossibility of the modernization of Russia [without the presence of our civil society](#), the activity of each person, based on their own merit. Rather, the rates of development of Russian liberal in the twentieth century showed to the world of the liberal area just [personal feat V.Novodvorsky](#). Now we are able to grow with the level achieved only stable and nothing more. I am convinced that the age of liberalism ended for the entire world. However, it is not yet understood neither the leaders nor the people, and science is not popular in many countries.

01.02.12

Today was a month after the end of my service in the Moscow mayor's office as a consultant on information technologies for the municipality staff

University in cooperation with the Russian Society of Sociologists and the Community of professional sociologists conducting scientific and practice conference of modern sociology CONTEMPORARY RUSSIAN dedicated to the memory of the first Dean of the Faculty of Sociology Aleksandra Olegovicha Kryshchanovskogo.

Made Doctor of Philosophy, Professor. President of the Russian Society of Sociologists, deputy director of the Institute of Sociology, Russian Academy of Sciences, Honorary Doctor of the Institute of Sociology. He noted that our sociology as a science dependent on political leaders to practice, and scientific luminaries are not aware of the society in which they live themselves. However, after the re-qualification of the political officer sociologists successfully represent Russia in international forums and began to establish trade unions, justly distributing budget funds and grants, exacerbating the hopeless state of activation of the population, and all countries of the control channels.

V.A.Yadov told that the future of sociologists is inseparable from globalization, the exact miscalculation of risks, which result from these or other so activities. However, they will have to solve the problem of local or more has a separate enclave, which is not enough in Russia.

N.E.Pokrovsky expressed the opinion that they have, over the hill there are not better things. Murk starts with the names of the international congress sociologists, and so forth, and he was talking about. And time was running out.

V.V.Radaev in Russian sociology identified 10 diseases. At the same time all our sores on what each graduate sociologist or an amateur like me, you yard in your pocket.

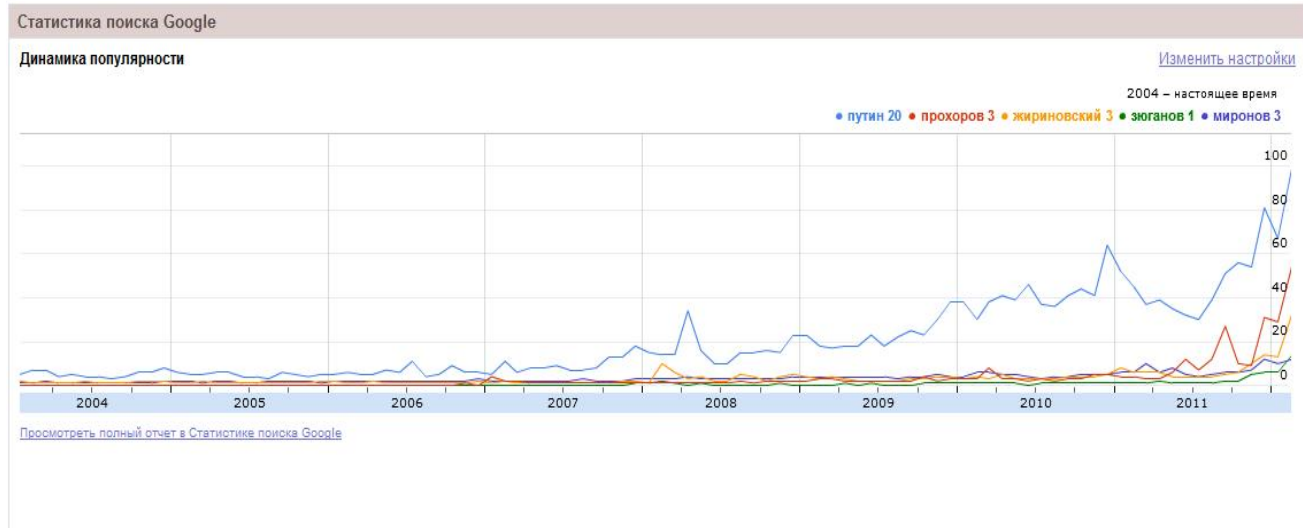

A.Yu.Chepurenskiy and most did not speak: the community was quick coffee break.

After coffee, I listened, and our social practices, measures the trends in sales from advertising any Coca-Cola and other consumer goods. They have tired thing was not as a commodity, and the label on it. And I went to the fresh air - airing the room there was no one, and my desire to raise the win the audience was not welcomed by the public pale.

On the street I'm sorry for the 4 hour drive from home to the HSE. And even introduced fitters, the innovative task of the Government to fasten the webcam to the polls instead of audiences even the leading universities of the country. And I felt very sad.

27.02.12

My measurements of the index of popularity of Internet users in the United States before the elections were confirmed as a result of elections. Whether this will work the same metering in today's Russia?

The dynamics of popularity shows that Putin will win in the first round or the second with Prokhorov.

15.03.12

The forecast was justified with a stunning result, and this was reflected in a small [article](#).

27.04.12

I am confident that the current self-improvement and self-organization of our people can only happen with the concept and a strong sense of self-esteem. Wake dignity in every person to participate in the humanitarian revolution XXI century - [the problem of modern Herzen](#). If it does not, then Russia after NTR will sleep and this revolution.

19.05.12

I am waiting for 18 years land [for a garden](#) . Since 1994, they assured me strictly in the military for several years [of accounting and control](#) applied to military service of veterans. Then the facts of individual enrichment were published at the expense of the total land, grew even some Rublevskoye areas around Odintsovo. Some received several sites on one benefit: and a vegetable garden and a garden, and a country house, and a garage and a parking lot, and now a new official new administrative formation again assured me of the effectiveness of the established order of strict accounting and control the distribution of wealth. Re-enter the life of generations not to walk - difficult to walk with a pram the newborn baby. On Vlasikha area and garages, parking lots and parked cars near the entrances exceeds the space for the residents of our strategic town, packed with high-rise buildings: are call to remove the car in an empty garage with a basement or parking there bellicose reminders of their rights in the existing rules and laws. It seems our strategies are always ready to interpersonal wars as well as constantly ready to start strategic Russian missiles at the enemy. However, and the city population of towns and cities are now often resolve issues stabbing parking.

I continue to hope still on the "established order", [and that still remains, if time did not understand, do not hurry up, not caught, not?](#) And I in fact advised to get rich at the expense of the common land and plots for veterans - "Get \$ 100 for two applications: one to the request, and the other on the failure of the plot If you do not get the \$ 100, by our sovereign and decorative nothing of democracy is not receive. And even a tuft of wool from black sheep. " Perhaps it will be so. No longer forces find anywhere poll a database of accounting and distribution of benefits and public goods - [portal of public services](#) it and has no plans yet, but from the last electronic Russian democracy remains closed one window at the darkness of hardware kit all our offices.

Is that the admiral himself to sew a tunic, buy dummies highest awards, to be photographed and say hello to the President himself in the most important area of the country - as did Costumed [general's](#) .

If these May days were called a time of remembrance of the fallen and reconciliation with former enemies of this would have happened. A Victory our numerous poor and weak man leans too many of the summer and good health and [in full frenzy](#) .

19.06.12

In Russia today [the transition](#) from the administrative-command system of management to post-democratic, ie, that which should ensure the sustainable development of society in the coming decades and centuries due to the activation of intelligence. The developed countries, too, are moving from developed democracies to postmodern and they have this social stage and the form and time will be different in each country, as if the process of converting a variety of caterpillar to butterfly. It should be expected that the post-modern, as well as Art Nouveau in the leaving age will be different each country, such as size, shape and colors of butterflies.

Rallies and marches in Moscow - is a reaction to the previous youth, outlived himself command-and-control method that has been applied for the election of a new Duma and the President. This is an echo of democratic euphoria naseleniya 1987-1999's when people intuitively rejoiced collapse of the CP Command Authority, which completed the Asian method of industrialization of the country - that is, force, without intelligence, without democracy, without masses of self-government, no interest of the masses in the form of motorization and its own housing. Of course, this was accomplished industrialization painful, ineffective, as childbirth cesarean section without any attempts mothers. The intensive development of natural resources, industrialization was accomplished without democracy in Russia and China and other countries. In Russia, the situation was exacerbated by the violent introduction of a secular system of relations of repression by the clergy, explosion or the devastation of churches.

But the world's resources are not limitless, denoting the limit of intense growth and of course comes a new post-industrial era. Following the scientific and technological revolution, which provided energy economy on hydrocarbons, is set scientific and humanitarian world. West with its tolerant, active population, held by secular democracy and stable social relations, apparently, easier to evolve, but our population and the country's leadership, lack of preparation for the new challenges, you can create yourself in trouble. I hope that this time the "classes" will cost without a civil war.

Of course, it is necessary to revive democracy, as a church, as a factor in public life, but [did not prepare the masses and the democratic parties as an engine of society](#) . The population in the new era will be important and need all values, not just democracy and its main values of freedom.

Today we need to create innovative scientific centers of social and cultural development of society, to reform schools, to create all conditions for value orientation population. We need to comprehend the bygone era and build a post-industrial (post-democratic), comfortable for living Russia, gradually moving away from the election of political leaders and their programs to the research projects of social management from the local to the national level which will be carried out openly with the real participation of each.

Perhaps such a thing as a citizen and civil society of the Western type in Russia and will not be established, since we have done without democracy in twentieth century, the civil society and of the last century makes no sense to us to put the old templates. Hopefully, after the constructive efforts, huge financial expenditures and scientific education in Russia, you may receive a value-oriented population, postmodern society, ie, people with protected human dignity that lives for happiness, not for the sake of civic obligation. In the new society take root treatment "your dignity", and will use the good old names of previous eras: Sir, Comrade, Brother ...!

If we build a just democracy, which is insufficient for the current post-democratic era, or restore and update only the command-administrative system that it is quite bad, the population of Russia once again lag behind the advanced our brothers from other parts of the world and in the XXI century. A Russia will pass the West again, the population of South-East Asia and other regions, and the dignity of the masses will break through the social explosion.

05.07.12

Today, actual slogan of sustainable social development: "Everything that does not work on the dignity of man, running against the man, against RUSSIA". It appeared the first article on this topic: there is a useful TV show [Let them talk](#) .

09/07/12

Yesterday on TV program [Let it be said](#) again and convincingly been shown another scene from the tragedy of Russian disoriented population, which has lasted for several decades. Honored teacher muhlyuyut at polling stations, and associate professors go further.

At the same time Russia closed all but the posters inviting to song and dance on the stage and ice.

Why not publish at least monitoring of basic human values: for example, the federal purse, local budgets and monitoring of local earnings. People to know the composition of the purse in a broad sense. Russian man to do away with servility, it is time to become a master of the state budget and the entire state. For example, we published that in [Krymsk](#) before the flood stole the money to clear the river and accidentally noticed only after the flood. And so everywhere accidentally discover the theft of millions. Strange coincidence with universal literacy.

7.10.12

saw the film " [Bobby Fischer Against The World](#) ", and once again saw history in the last genius chess player, that value orientations are extremely important in today's world, everyone. Spassky, Karpov and Kasparov me respected, but they are still part of the system and targeted training of the School of propaganda against the West, the individual and the icon of the Cold War - [Bobby Fischer](#) , who, in turn, no doubt influenced by the CIA at the State Department, against whom he has performed all the rest of my life on the brink of his madness in a mass psychosis in the twentieth century and Death of Bobby, and the tragic fate of other participants image projects at public expense appeals to the Governments of all countries: - " [Give up propaganda and gross interference in the value of human orientation system. population](#) . loans security and the financial and economic performance

A year ago, in the guestbook Vladimir Voinovich, our classics of literature, I left a note:

School program in literature

Vladimir Nikolayevich! I looked school program in literature, perhaps I'm wrong, but have not found your works there. Two or three tales in Class program would need to make at the expense of bulky fabrics of other authors. For example, The Tale of a stupid Galilee in conjunction with the text of astronomy, would significantly help our young people to build a new generation of its sustainable happiness, attentive to the human dignity of the community, no matter how wild or developed it is. In this case, the population will receive very important concepts of astronomical and social time. school debates about Galileo - fool or not remembered firmly and for a lifetime. Now that the earth moves, the majority does not remember, and the minority of the false wisdom of the spin on the mountain do the rest.

Created: 2012. February 19th

Today I repeat the entry in connection with the publication on the website <http://litradio.ru/author/392.htm> his tales performed by the author, a con version of the tale of Galilee [here](#) .

09/05/2013

Hopefully this symbol of human basic values will be clear to everyone and on this basis create the most intelligible regional variants. I painted after his content analysis of "value person" in the books of my time on an index of the Goc
